TABLE OF CONTENTS

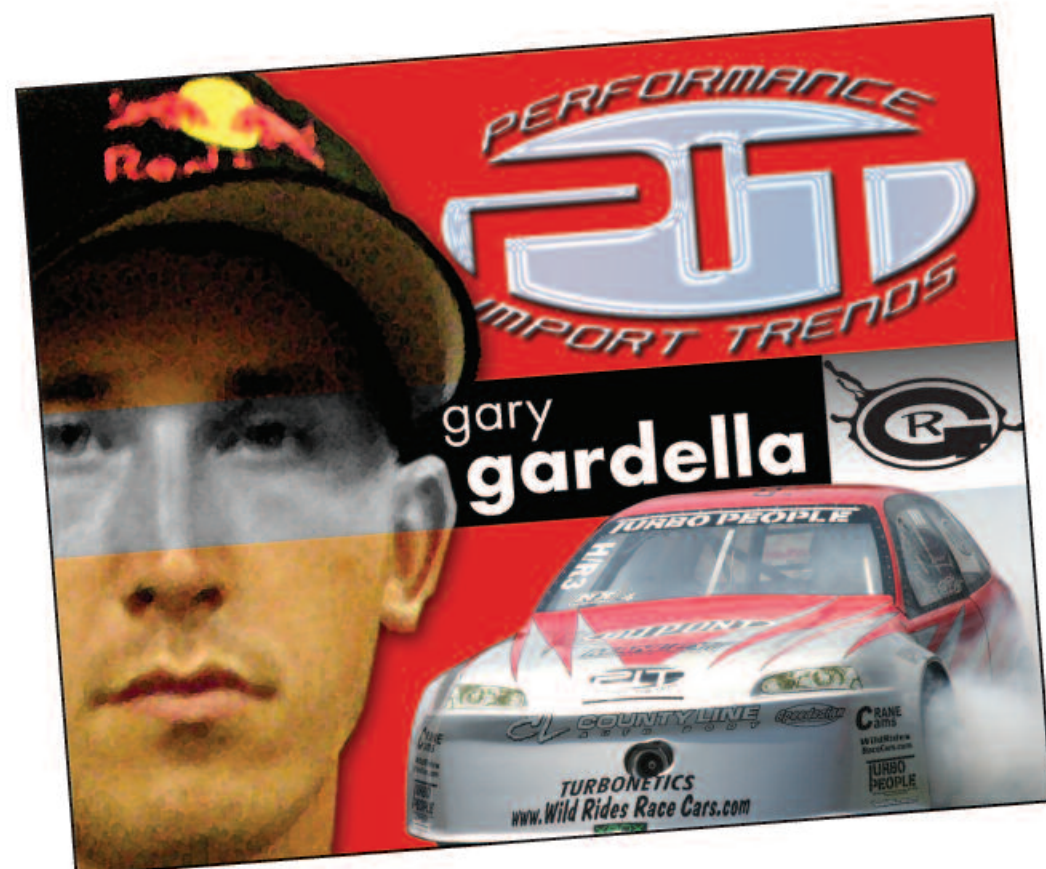

www.performance-trends.com

Performance Import Trends is proud to announce their sponsorship venture with NHRA sport compact drag racer Gary Gardella.

Gary's career has been skyrocketing since the start of the 2001 import season with such highlights as the 2003 national record holder for ET and MPH and several wins at Nationals, NOPI Series and IDRC.

Join us in welcoming Gary to the P.I.T. family and root for us during the upcoming season.

CAT-BACK EXHAUST

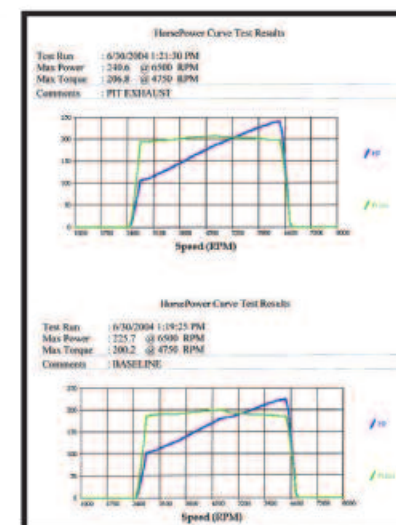

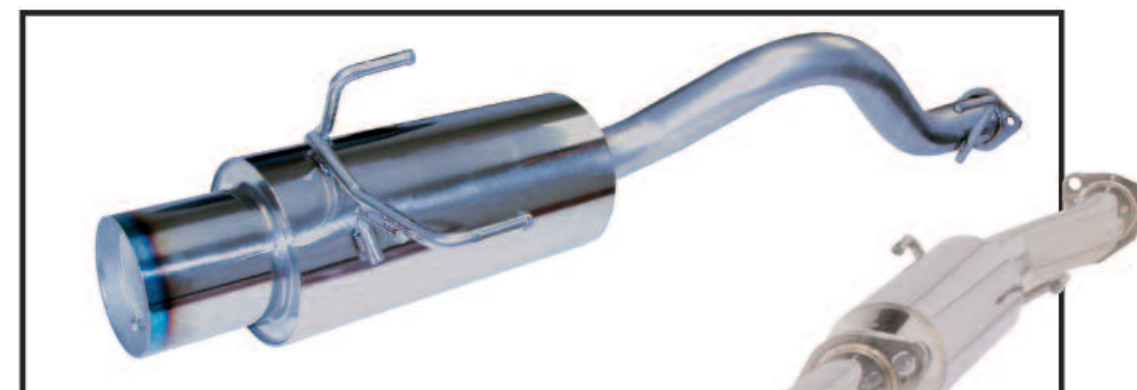

1.866.639.8845

www.performance-trends.com

The P.I.T. N1 Series exhaust systems are available as direct bolt-on replacements for OEM exhaust systems without the restrictive bends and back pressure. This allows the engine to create more power and torque by breathing easier. By utilizing flow analysis, dyno testing and OEM fitment, our exhaust systems produce maximum horsepower without dramatically reducing low-end torque.

The quality of the P.I.T. N1 stainless steel exhaust is second to none and they perform as good as they look. The specially designed muffler and large diameter mandrel-bent piping have no reduction of inner diameter in bend areas which allows for superior exhaust flow compared to crushed bent piping. Performance increases vary by application, but gains of 5-20 horsepower are average. Our exhaust systems are designed for maximum performance styling and aggressive sound. The silencer is removable for convenience.

Our systems feature 3/8" thick flanges and all necessary gaskets and hardware. They utilize factory mounting points and hanger locations for the easiest bolt-on installation possible.

You can expect increased horsepower and torque from a P.I.T. exhaust.

Add a "T" after the part number for titanium.

Every P.I.T. cold air intake is constructed of CNC mandrel bent aluminum using the latest Solid Works CAD to ensure the smooth high flowing bends. The intakes are available in silver or gunmetal polyester urethane powder-coat finishes. Each system also includes silicone reinforced boots, anti-vibration mount, stainless steel t-bolt clamps and a 4 layer cotton gauze filter with velocity stack.

BLOW OFF VALES

1.866.639.8845

WASTE GATES

www.performance-trends.com

PART# 9900

The 9900 BOV is the loudest in our line up. This is a high flowing valve designed for 10 to 25 PSI. Machined from solid aluminum and comes with a steel and aluminum mounting flange for easy installs. Spring pressures are adjustable using supplied washers. The 9900 is available in an anodized silver finish.

PART# 9901

The 9901 is designed to provide greater venting flow, and is designed for larger turbos with boost levels between 10 and 25 PSI. Machined from solid aluminum and comes with a steel and aluminum mounting flange for easy installs. Spring pressures are adjustable using supplied washers. The 9901 is available in an anodized silver finish.

PART# 9902

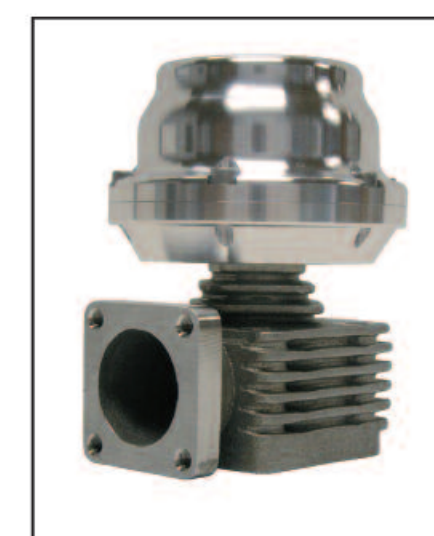

The 9902 is designed to be an OEM replacement valve for the new Subaru WRX. Ease of installation, great sound and performance makes this a must for any WRX owner. Machined from solid aluminum and available in an anodized silver finish.

38MM

PART# 9800

Our 38mm wastegates are made with the highest quality materials leading to increased reliability and longer life. These materials include: 347 SS Alloy for valves and valve housings, high temperature Nomex reinforced actuator diaphragms, SS actuator springs (which gives consistent pressure even at high temperatures), and our flanges are CNC machined from 304 SS measuring 12mm thick. All of our 38mm wastegates come with air fittings, SS hardware and a .6 bar actuator spring.

40MM

PART# 9801

Our 40mm wastegates are for the more serious competitors. They are constructed of even higher quality materials focused on meeting the needs of today's most dedicated racer. With a larger body the 40mm wastegates are designed to increase flow and maintain higher boost levels. All of our 40mm wastegates come with air fittings, SS hardware and a .8 bar actuator spring.

CAM PLUG & FUEL RAILS

1.866.639.8845

CAM PLUG

Our cam plug is CNC machined of solid aluminum and incorporates a triple O-ring design.

PART#
9602

APPLICATION
Honda B-series motors

FUEL RAILS

Precision CNC machined from 6061 T6 billet aluminum and features a large fuel bore for maximum fuel delivery on street or full race engines. Kits come with all of the necessary hardware and allows use of stock fuel pressure regulator.

BOOST CONTROLLER

www.performance-trends.com

BOOST CONTROLLER

PART# 9700

The all new BCU+ (Boost Controller Unit) is the first boost controller to feature multiple stages of boost, a built in turbo timer, boost gauge, voltmeter and two 12 Volt outputs. P.I.T. uses the latest technology to give the user multiple ways of controlling and monitoring boost levels. With High and Low stages of boost and adjustable gain you can tune the boost to switch depending on track or road conditions. The BCU+ also incorporates an Automatic and Manual Turbo Timer to let your engine cool down after a run. By using the electrical Outputs you can use the BCU+ to control any 12V DC source, like a nitrous kit and/or intercooler spray. Know exactly what's going on with your engine by using the Last Boost and Voltmeter settings on the easy to read LCD screen.

Light Rodz are the future in under car lighting kits. Made from durable acrylic rods, they are virtually indestructible and can be heated, bent or cut to form almost any shape imaginable. 5 colors are available with four 50,000 hour LEDs at each end of the rod supplying continuous light. Kits come complete with two 3' and two 4' lengths and all hardware.

12" accent rods and replacement endcaps are also available.

CARBON FIBER ACCESSORIES

1.866.639.8845

YEAR	APPLICATION	PART#
02-cur	Subaru WRX	5502

Our carbon fiber hood scoop is a direct OEM replacement for the Subaru WRX with all of the height and style of the original STi scoop. Manufactured from 100% carbon fiber and uses all of the factory hardware.

YEAR	APPLICATION	PART#
all	universal	5500

These 56" wide carbon fiber wings are universal fit to work with most current sport compacts. They are made of 100% carbon fiber while the feet are CNC machined from aluminum for an overall light weight.

FLOOR MATS

www.performance-trends.com

These floor mats are a must-have for the sport compact enthusiast. Cut from Brite-Tread aluminum, each application is custom made for an exact fit for today's popular makes and models. The non-rusting material is easy to clean and provides a unique luster.

P.I.T. mats are cut to fit the OEM fire-wall angle.

Brushed aluminum

Dress up the interior of your vehicle with a PIT dash kit each kit is a high-quality, molded ABS laminate overlay. These innovative molded dash kits keep pace with the contoured dashes of today's vehicles. Our special molding techniques allow each piece to conform to the contoured dashes and door designs of today's vehicles. These innovative kits are available in brushed aluminum and carbon fiber.

- Manufactured from high-gloss, UV-stabilized, and scratch-resistant finish bonded to an ABS substrate.
- Molded pieces for superior fit and complete coverage, which are easier to install than comparable flat pieces.
- Utilizes pressure sensitive, automotive grade 3M adhesive tape, which is pre-applied for a quick and easy installation.
- Adheres directly to the existing factory dash, with no drilling, cutting, or special tools.
- Available in Carbon fiber and Brushed Aluminum finishes.
