## THIS IS THE NEW STANDARD FOR HD VIDEO CAMERAS

Replay XD has set a new standard for building rugged HD video cameras that feature ultra-sharp HD video, superior audio quality, and limitless mounting options, all built into a weather-resistant, hard anodized, rugged aluminum housing so you can record and replay your extreme adventures.

The Replay XD1080 & Replay XD720 are the smallest and lightest HD action-cameras on the market.

Simple, ON/OFF and Start/Stop buttons make each camera easy to operate. Simply turn it ON and press Record to Start. The built-in LED & Vibration Feedback tells you that you're ready to go. It's really that simple.

MEET THE SMALLEST HD CAMERAS

# REPLAY

XD1080

Replay XD1080 can practically be mounted anywhere due to its small form-factor and all-round shape. There are two mounts included with each system to get you recording in no-time.

## Rotate, Tilt, Swivel, Clip, Mount, Etc.

**LowBoy Mount (Fixed):** Lowest profile mount, offers 360° lens rotation. Designed to be low and out-of-the-way. Compatible with our SnapTray VHB bases.

**HeimLock Mount (Swivel/Tilt):** Features spherical adjustment with an eccentric cam-lock for a rock solid mount. Over 1,036,800 Mounting Positions with 360° lens rotation, 360° camera rotation, and 8° of tilt, not including the unlimited areas you can mount 1 of 4 included SnapTray VHB bases.

## Finely Tuned Optics

Replay XD1080 features class leading optics. Never before has an action-camera featured such a high quality lens. With its custom designed wide angle 135°, f3.1 lens, and anti-glare coating, this lens is finely-tuned to match the 5MP CMOS sensor for better clarity, accurate color, and minimal image distortion.

Replay XD1080 also features a removable front lens bezel to accept our ProLens 37MM Adapter for Lens & Filter kits. (Available Soon)

## Don't Suffer from Distorted Field of View

✓ Replay XD1080 Natural 135° FOV

✗ Competitors Distorted 170° FOV

# LIFE'S IN HD... REPLAY IT.™

## Live Action HDMI

Replay XD1080 is the first to stream full 1080 HD through the built-in HDMI out connector. You can record and stream your video simultaneously or just stream your video straight to an external HD recorder. The Replay XD1080 also features live Playback to a monitor or TV.

## Audio Times Two

### Internal Audio:

Along with everything else, we spend a lot of time obsessing over audio. We've accumulated thousands of hours developing, engineering, and testing the right combination of acoustic materials and microphones to suppress windnoise yet still capture realistic audio.

### External Audio:

For the extra critical audio situation we have built in an External Audio option to connect high quality Lav Mics, Ext. Audio sources, or other In-car Radio Communication through a standard 3.5mm Mini-jack adapter.
