STROKER KITS

The K Series stroker kit from Brian Crower features:

- BC 4340 billet steel crankshaft (92mm K20, 102mm K24 stroke).
- Premium 4340 steel billet, custom connecting rods w/ARP fasteners.

For high mileage, daily driver applications (15,000+ miles annually), BC highly recommends the steel retainer for added longevity.

STROKER KITS

The K Series stroker kit from Brian Crower features:

- BC 4340 billet steel crankshaft (92mm K20, 102mm K24 stroke).
- Premium 4340 steel billet, custom connecting rods w/ ARP fasteners.
- CP aluminum forged pistons (any bore size, any compression ratio).
- 5100 series steel alloy wrist pins for added longevity and reduced flex.
- Ductile iron plasma top rings, tapered second ring, low tension oil rings.
- High strength ACL copper-lead rod and main bearings included (**BC4020**).
- Fully system balanced and ready to install.

The BC stroker kit for the Honda/Acura K Series engine platform incorporates the wider B16A bearing (.935" width) that offers more surface area than the .740" width bearing found in the OEM K Series crank and rod combination. The added surface area increases bearing life, especially at extended rpm.

Note: This kit requires custom connecting rods (modified BE bore and BE width).

STROKER/CUSTOM PISTONS

CP custom pistons are made to order with 2618 aluminum forgings that are application specific. Choose any desired bore size and compression ratio, as well as added features like 9310 alloy wrist pin upgrade (5100 series is standard), anti-detonation grooves, lateral and/or vertical gas ports, and chamfered pin boss. All customs include premium ring pack with ductile iron plasma top rings, tapered second rings, low tension oil rings and spiral locks. Custom pistons require 50% deposit prior to production.
