CUT-OUT FLARES®
1966-77 Ford Bronco

ADDING **STYLE** HAS NEVER BEEN EASIER

BUSHWACKER HAS BUILT ITS REPUTATION AS THE LEADING MANUFACTURER OF FENDER FLARES AND TRUCK ACCESSORIES FOR OVER 40 YEARS. Our innovative design, engineering experience and use of quality materials form the ultimate fender flare. From the development of our first fender flares for the Ford Bronco to our latest releases, our unmistakable passion for style and our dedication to offering the highest quality products truly sets us apart.

5 FLARE STYLES

Bushwacker Street Flares are designed for use with stock tire and wheel packages... adding the finishing touch to any vehicle. The unique low-profile designed Street Flare focuses on looks while adding style to the side of the vehicle.

Bushwacker "OE" Style Fender Flares offer truck and SUV owners the factory look in an aftermarket flare. This unique line of fender flares lets you add style and protection, upgrading your vehicle in minutes. Installation is easy with our No-Drill application process.

Bushwacker Extend-A-Fender Flares are great for larger tire and wheel packages, which may require additional coverage. They give you that "Limited Edition" look for a fraction of the cost, plus extra protection from road debris.

Bushwacker's new line of Pocket Style and Boss® Pocket Style Fender Flares® give you the bold look of pockets without drilling or cutting your vehicle! This exclusive line of flares installs using the existing factory holes and gives the look of being bolted onto the side of the vehicle.

Bushwacker Cut-Out Fender Flares are designed for the most aggressive tire and wheel packages around. With the bold look of Bushwacker "pockets", Cut-Out flares add dramatic styling while allowing you to cut open the wheel well to accommodate large tire and wheel packages.
