New Products in Yellow Text

Introduction

TFP, INC. was established in 1985 in Bangkok, Thailand to produce high-quality cosmetic/decorative parts and accessories for **passenger cars, light trucks and SUV's**. Almost 20 years later, we have grown to over 500 employees and serve customers worldwide in both the **OEM (see below) and Aftermarket Automotive Industries**.

Over the years, we have developed leading expertise and **PROCESS CAPABILITIES** in Thermoforming, Metal Stamping, Injection Molding, Compression Molding, and Robotic; Machining, Welding, Trimming, and Cutting, Tooling/Mold making as well as various Metals and Plastics finishing processes.

Our products and Process Capabilities have also evolved into **TWO PRIMARY SEGMENTS**:

EXTERIOR TRIM AND PROCESSES - includes Stainless Steel, Raw Material-based products like Fender Trim Moldings, Door Handle, Tailgate, Mirror, Headlight, Taillight Insert Trim and Insert Guards, Others are Plastic, Raw Material-based products like Bug Guards, Window Vent Guards, Chromed Taillight, Mirror, Taillight, Insert Trim and Insert Guards.

INTERIOR TRIM AND PROCESSES: include Stainless Steel Sill Plates, and using Plastic/Wood-based raw materials, Molded Dashboard Fascia, Automatic Shift Knobs, and Steering Wheels.

We believe that our substantial installed base of products to the OEM's is a significant competitive advantage for providing many products to the Aftermarket that are best described as:

"The Trim the Factory Forgot!"

As we are currently in a **global expansion** to numerous markets, you can find us exhibiting at these following Automotive OEM and Aftermarket Tradeshows: Automechanika - Frankfurt, Germany; EquipAuto - Paris, France; AMPA - Taipei, Taiwan; International Aftermarket Expo - Chiba City, Japan; Australian Automotive Trade Fair - Melbourne, Australia; Bangkok Motor Expo - Bangkok, Thailand; RUJAC - Guadalajara, Mexico; AutoMechanika Expo ASIA - Kuala Lumpur, Malaysia; and other shows in Sydney, Australia and even Dubai, UAE, - the "Gateway to the Middle East"

At TFP, Inc., our objective is to become even a better, "BEST SOURCE OF FENDER TRIM MOLDING/INSERT ACCENTS™ / CHROME DOOR HANDLES", as we still are the only original hi-quality/volume manufacturer of these types of products, based in the USA. Simply, this is due to the fact that we remain the only "true" manufacturer, that actually produces almost all these types of products "in-house", and just have developed all the necessary experience in the US Market over the last 23 years, to remain the leader. In fact, we produce annually millions of fender trim and insert accents, which is much more than all our competitors put together!

TFP, Inc. employs over 800 people at our 4 Thailand factories and is an award winning supplier to Honda, Toyota, Nissan, Mitsubishi, Isuzu, and Mazda, of accessories, which we make at the same high level of quality as in all of our products produced for the North-American Aftermarket, which are featured in this catalog.

In 2003 we expanded our Tokyo, Japan Operations and in 2004, opened our new Sydney, Australia branch. Next year we will open operations for the Middle East and Eastern Europe market out of Dubai, UAE which is a rich luxury market for our products.

In 2006 we opened a second warehouse in Los Angeles to better serve our demand with additional inventory.

In 2008 we opened another, even larger warehouse in Los Angeles to keep up with the increased demand.

In 2009 we will have completed the construction of our new World Headquarters in Thailand in which the current 4 TFP factories will be consolidated into one large custom facility.

TFP: Category Creator of A/M Bright Trim Accessories

TFP, Inc. started in 1988 as a small niche manufacturer of Stainless Steel Trim, selling nationally from Los Angeles. It's factory in Thailand also sold accessories DIRECTLY to the Japanese OEM's like Toyota, Nissan, Mitsubishi and Isuzu.

Enormous success led TFP to expand to a large custom factory, which is their world headquarters in Thailand with over 800 employees.

There have been 5 main factors that lead to this explosive growth over the years:

1. The Thailand marketplace has become the second largest world market after the U.S. for pickup trucks, enabling TFP to expand their sales opportunities considerably in other Asian markets, after proving their quality and consistency with the OEM's.
2. With the same high standards of production offered to OEM, this experience allowed TFP to literally "thrive" in the U.S. bright trim aftermarket, selling OEM-level quality products to the marketplace.
3. The Creator of Stainless Steel Fender Trim Molding, introducing it to the U.S. Market and continuing to offer the best in quality and value, allows TFP to remain a true market leader. They offer their "Famous TFP Fit" in which they guarantee fitment. Returns of their product from their biggest customer is said to be less than 1 percent.

In 2003, TFP received a patent for the No-Drill Mounting System utilized in all its fender trim, further allowing TFP to be the new high standard for the marketplace. A market demanding more non-destructive accessories like these, and even more so in the future for newer vehicles.

4. Constant launching of new fender trim molding lines creates new industry standards for value. The introduction of ValuTrim, 2nd and 3rd Generation fender trim molding, will enable TFP to remain a leader for many years to come as they've been in the past 10. Please see these new product release details further into this article.

5. The Creator of Aftermarket Exterior Bright Trim Category first launched in 2001 in the U.S. aftermarket. These included bright trim inserts for vehicle exterior body parts like door handles, mirror covers, taillight covers, etc. All were introduced years before cheaper plastic copycat versions. As the majority of TFP's inserts are produced in stainless steel they clearly outlast and outperform.

The simple fact is, door and tailgate handles are considered very high wearing areas — Tier 1 supplier engineers informed TFP of this in the beginning when they began trying to produce the insert line originally in chromed plastic (which was much cheaper to produce vs. stamping stainless steel that uses numerous molds and dies for each handle and is at least 5X more expensive to produce). Their (Tier 1's) door handles supplied for the Dodge Ram Pickup are made to endure over 300,000 cycles (complete door movements of opening & closing) over the 9 year average life of the vehicle!

Therefore, tell your customers to insist on stainless steel inserts for all high wear areas such as for the handles!

TFP stainless steel handles have proven durability — and as most major WD's share this long-term strategy, that includes selling the highest quality

products which TFP provides. Over the years and with some multi-million-dollar WD customers later, this fact remains obvious.

FOUR NEW PRODUCT RELEASES FOR FALL!

"VALUTRIM" Fender Trim Molding

"TFP Reverses Time" by relaunching this 2002 program at 2002 prices! 20% lower cost on all sizes. Same TFP quality with the same TFP fit.

You will not be able to tell the difference from our original line except for a better finish and other improvements at 20% lower pricing.

The no-drill feature included in this line offers outstanding value, with the same wide-style traditional design we've offered for the past 10 years.

NEW VALUTRIM RETAIL PACKAGING

"2nd Generation" Fender Trim Molding

This new stainless steel fender trim molding is "packed" full of features:

- ◆ Glossy Black Retail Packaging — enables store to finally display fender trim as each package has large colored truck photos with the trim featured, as well as other complimentary chrome trim products offered by TFP. It will literally sell itself
- ◆ "Invisible Underside" — TFP powdercoats in flat black, the lower flange area along with all the mounting hardware, resulting in a clean look which matches the plastic inner wheel fender and minimizes the accent on the lower area. Meaning, only the bright trim face area is accented — in the right area — for the cleanest cosmetic appearance possible.
- ◆ Almost Invisible Rubber Gasket — This new gasket is 3X thinner than the original TFP design, yet still allows for sufficient vehicle fender paint protection for that non-destructive feature.
- ◆ Same Traditional "Wide-Style Design" which has been a TFP Standard for the Last 10 years.

2ND GENERATION RETAIL PACKAGING

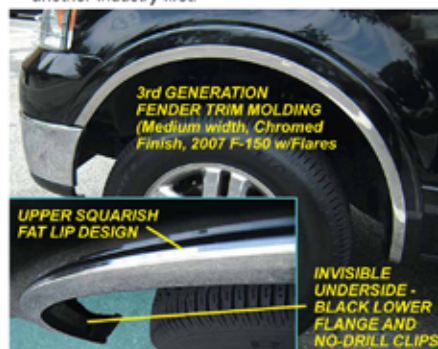

"3rd GENERATION" Fender Trim Molding

This revolutionary new stainless steel fender trim molding will change the way you view this product — and will impact the fender trim molding category for many years to come!

It is designed to meet all the cosmetic expectations you ever dreamed of for new vehicles, so expect the fender trim molding category to explode!

Features:

- ◆ Same (2nd Generation) Glossy Black Retail Packaging.
- ◆ Same (2nd Generation) Invisible Underside.
- ◆ Exclusive "Fat-Lip" Top Edge Design — Enables the thin trim to appear luxuriously thick like OEM-designed trim of many decades ago.
- ◆ Exclusive Invisible Gasket — TFP's unique design allows for the rubber gasket to offer protection, but at the same time be hidden underneath the fender trim molding for that clean look.
- ◆ Available In 3 Finishes — Mirror-Like Polished, Chromed and Brushed.
- ◆ Available In 3 Sizes — Narrow, Medium, Wide Widths of the faces for 3 totally different looks — another industry first!

"Brushed Insert Accents"

The new brushed satin look is the rage in Europe and will be soon in North America too. Available as OE on Audi, Porsche, and VW vehicles as well as others. Also found on expensive billet handles. An expensive look for a fraction of the price! Features:

- ◆ Heavy Duty Stainless Steel Construction for accenting of all high-wear areas like door handles.
- ◆ Blister Pack Retail Packaging — Featuring a vehicle-specific application of a particular part in that package — pictured installed on that particular vehicle. Glossy black background highlights the bright trim piece. Installation instructions and application guide are featured on the back side.

BRUSHED HANDLE INSERT

NEW! Stainless Steel Headlight Insert Guards - Truck/SUV

2004 Dodge Ram P/U #921

Patented "Rock-Shock" Mount

2001 Dodge Ram P/U #920

2005 Ford F-150 #931

2004 Ford F-150 #931

2005 Ford Super Duty #933 (Older F-250 99-04 #932)

2005 Chev. Silverado P/U #902 (Older Silverado 99-02 #901)

2005 Sierra P/U #940

2003 Ford F-150 #930

2007 GMC Yukon #964

2007 Dodge Ram P/U #982

- Our patented "Rock-Shock" mounting system helps provide suspension/damping from rocks and debris, that also helps protect the headlight or taillight lens.
- The louver design insures maximum visibility and reflectivity of headlight and taillight unlike most tubular style guards.
- Very attractive look for restyling which also provides some protection.
- Easy insert/mounting installation - all models do not require any drilling or brackets (make sure lens surface is completely clean before mounting - Adhesive Promoter can be utilized for maximum adhesion of guard if required - small package of promoter is included with each kit)
- Available for GM, Dodge and Ford Trucks and SUV's.
- **Now Available in optional Brushed Finish (BR)**

NEW! Stainless Steel Taillight Insert Guards - Truck/SUV

2005 Dodge Ram P/U #981

contd.

TFP Hitch Holster™

U.S. Patent

2004 Dodge Ram - Double #11199HT
(without bedliner)

2002 Ford F-150 - Double
#12013HT (with bedliner)

2002 Ford F-150 - Single
#12039HT (with bedliner)

2004 Dodge Ram Tie-Down
W/ Single unit lock pin

Double unit before installation
(Placed on bedliner - not mounted)

Close up of F-150 Tie-Down
(Hitch Holster mounted above)

- The Hitch Holster neatly bolts to the inside of your truck bed and will hold up to 2 hitch ball mounts
- **Single and Double Holster** units are available for each model
- The ball mounts slide into place in the Hitch Holster and are held with their hitch pin or lockable bracket included (padlock sold separately)
- **EASY INSTALLATION!** All models require **no drilling** as they bolt in place using the existing factory built-in Tie Down Brackets (Designed to permit use of factory tie-down when mounted in place)
- **SAFETY!** Storing ball mounts in the cab of your truck could cause serious injury in the event of stopping quickly or an accident
- Storing ball mounts loose in the truck bed may cause damage and ball mounts may be lost or stolen
- Hitch Holster is the safest way to transport and store your hitch ball mounts and still have convenient access to them for usage
- Available for all full-size GM, Ford & Dodge trucks in single and double models (Over 15 models)
- Mid-size trucks by GM, Ford & Dodge will be available soon! (S-10, Colorado, Ranger and Dakota)
- Older models like GM '88 - '98 and Ford '87 - '96 trucks are "drill-only" versions do to the lack of factory tie-downs in place to utilize (Drill in place to upper side of tailgate / stake pocket - not bottom of bed)
- Works with most bedliners (some aftermarket models require minimal trimming of bedliner with knife)

NEW!

Hitch Insert Accent - Chromed or Black Paintable

2007 Chev Tahoe (Before)

2007 Chev Tahoe (After) #10142HI
