

2009 PRODUCT GUIDE

Chatter **Box!**™

At ChatterBox, our mission is to provide our customers with powerful and reliable systems that offer state-of-the-art design and technology. Each member of our entire communication line offers unique features and benefits, and is built to meet our exacting standards. All of our systems feature crystal clear reception, range, portability and price. ChatterBox communications systems are designed with interchangeable components and upgrades in mind, so that our customers can grow with us. We pride ourselves on our rigorous testing protocol and our outstanding customer service.

Chatter **Box!**™

CB 50 Wired Intercom

The CB50 Tandem Pro is our best selling intercom with such features as true stereo sound, an audio input to listen to your favorite tunes, and a cellular input to keep in touch with friends. The CB50 has been used not just for driver to passenger communication on motorcycles but is also widely used for in-car instruction between instructor and student.

The CB50 Tandem Pro kit comes with the main unit, rechargeable Ni-HM battery that last for up to 8 hours of talk time, AC home charger, and extension cord and all the necessary brackets with mounting hardware.

(Driver and Passenger headsets sold separately)

CB FRS Bike-to-Bike

The FRS Multi-Sport is our entry level bike-to-bike communicator. It's endless use makes this model the most versatile communicator in our lineup. Our state-of-the-art electronics and shock resistant casing make the FRS Multi-Sport not only reliable but strong enough to withstand tough off-road conditions. The FRS Multi-Sport is VOX (voice activated) or PTT (push-to-talk) with full duplex wired intercom (passenger headset and extension cable sold separately). It also features audio (music, navigation or radar) input with auto mute. It has a 2 mile range with 2 channels.

power filter cord

CBBTCP *msrp* \$3.99
universal belt clip

CBFFMB *msrp* \$4.99
universal mounting bracket

MS3 Bike-to-Bike

The ChatterBox! MS3 was designed after the most popular entry level model in our line up, the FRS Multi-Sport. We Took all the features of the FRS Multi-Sport and reduced the size by almost 40%. We used the same rugged shock-resistant casing to withstand all the harsh conditions.

The MS3 has 2 FRS channels that transmit up to 2 miles in range with up to 6-8 hours of talk time and 20 hours of stand-by time. It has the same VOX (voice activated) feature as well as a push-to-talk button on the side of the casing itself. (wired push-to-talk also included)

The MS3 still has the same popular features such as audio input with auto mute and a built in private wired intercom (passenger headset and extension cable sold separately).

Not only is it reliable, its much smaller as well. Weighing in at 78 grams, that makes it the lightest and smallest transmitter in the market.

Part#

CBMS3FKIT (full face kit) \$199.95

CBMS3OKIT (open face kit) \$199.95

Kit Includes:

MS3 Unit

Microphone/Speakers

FRS X2 Bike-to-Bike

The FRSX2 is our second most powerful communicator in our lineup. The FRSX2 has a large illuminated display, and is VOX (voice activated) or PTT (push-to-talk) with full duplex wired intercom (passenger headset and extension cable sold separately). It also features mobile phone and audio (music, navigation, and radar) inputs with auto-mute, in a tough water resistant casing. The FRSX2 also comes with Hi-Fidelity speakers and noise-suppression microphone. The X-series are powered by our high capacity, built-in rechargeable Ni-MH battery that lasts for up to more than 10-12 hours of use and 20 hours of standby. The FRSX2 has a range of up to 2 miles and has 14 channels/38 talk groups.

XBi Wireless Intercom

We value our customer's suggestions and designed a model that is unlike any other on the market. Communicate rider to passenger via CDMA crystal clear technology. Both rider and passenger module is capable of pairing with up to two accessory devices at the same time. (ex. cellphone, Mp3 player, satellite radio, GPS, or radar detector) SMART technology will automatically prioritize the transmission of the paired devices. The XBi is so far advanced that it can even stream music from one module to the other. Each module is also capable of being used by itself to pair accessories when riding alone. Other features include: A rechargeable Li-Poly (lithium Polymer) battery with 6-8 TRUE hours of power, 1 hour express charge, noise suppression Hi-Fi headset, compact aerodynamic module design. Each kit sold individually will include: module, Li-Poly battery, AC Home charger, headset and mounting hardware.

XBi2 Wireless Intercom

The XBi2 is our latest bike-to-bike wireless intercom that also comes equipped with A2DP Bluetooth® technology. It has all the features that the XBi has but with additional power that will allow simultaneous communications between 3 riders with up to 500 meters of range (1,640 ft) in optimum conditions.

The XBi2 will allow you to stream audio signal from any source that already comes equipped with Bluetooth® such as mobile telephones, Mp3, GPS and even an iPod/iPhone when hooked up to a Bluetooth® adapter such as our AP21 or AG12. After all, the whole point of Bluetooth® is to eliminate that pesky cable that most intercoms are dependent on for receiving audio signals.

The XBi2 will allow for up to 6-8 hours of true talk time and 48 hours of standby time on one charge.

Passport 8500 X50

Hailed as the most revolutionary radar/laser detector ever. The Passport 8500 X50's new "V-Tuned" radar receiver provides extreme detection range on all police radar; conventional and "instant-on" radar; including the new POP mode radar threat, X-Band, and up to 50% more range than the original Passport 8500 on the all-important K and Ka bands. Digital signal processing (DSP) provides maximum range, with minimum false alarms.
