## SUPER-LIGHT, FABRICATED ALUMINUM VALVE COVERS

These precision-welded fabricated aluminum valve covers are offered in two designs: For racing with no holes, and for street (where permitted) with the traditional 1.22" hole and GM-designed baffle. They have recessed Bowtie™ and CHEVROLET® Emblems, inlaid with classic Chevrolet red, billet mounting rails for maximum leak resistance, and weigh approximately 3 lbs (45%) less than stamped steel die-cast pairs! All valve covers with baffle come with baffle and grommets. Sold in pairs.

## Stamped Valve Covers

These CHEVROLET Bowtie valve covers are made of heavy-gauge steel, 20% thicker than typical aftermarket valve covers, greatly reducing the likelihood of leakage around the valve cover flange area caused by fasteners being over-torqued. The chrome plating meets GM quality specifications. All valve covers bear the powerful Bowtie and CHEVROLET Emblems.

Black crinkle valve covers, with their distinctive look and boldly striking Bowtie and CHEVROLET Emblems, inlaid with classic Chevrolet red, are CED painted for long-term corrosion resistance, and then black crinkle painted on the outer surface.

Stamped valve covers are offered in either tall or production height (short). Oil restricting baffles are offered in many valve covers for those who wish to maintain the PCV hookup. All valve covers are sold in pairs, equipped with air breather and PCV grommets, unless specified otherwise. All valve covers with baffle come with baffle and grommets.

**Technical Note:** Production height Chevy small-block valve covers and valve covers with baffles will not clear most stud girdle applications. "Chevy small-block" or "S/B" refers to 1958-1986 engines. "Chevy big-block" or "B/B" refers to 1965-1996 engines, unless otherwise specified.

141-102.....Chrome, S/B, short, with baffle

## 2-Piece Die-Cast Aluminum Valve Covers

**2-Piece valve covers with the popular CHEVROLET and Bowtie Emblems.** Now you can easily check your valve train while the engine is running. The diagonal cut of the top section ensures no mess.

Each valve cover features oversize bolts for fast removal, a top and bottom section, and a retained gasket for a tight seal. Will clear roller rockers and stud girdles and available in six choices. Comes with required Allen wrench.

**Fits Chevy small-block 1958 to 1986 engines.**

Removable OEM style baffle. Tall. All valve covers come equipped with baffle and grommets. Sold in Pairs.

U.S. Pat. D543,998S **Technical Note:** Will not fit cylinder head 12340034 or similar (with three rectangular raised internal sections near the valve cover mounting surface), unless such sections are milled off.

## Air Cleaners

These air cleaner kits are offered in two styles, the "classic," which reflects many years of GM air cleaner styling, and the newer "high-performance" look. They are equipped with the CHEVROLET Emblem, and they are supplied with genuine GM (AC) air filter elements for maximum airflow. Both the tops and the bases are chrome plated to exacting standards for long-lasting appearance, and each kit is supplied with necessary mounting hardware. The classic air cleaner kits are supplied with special die-cast Bowtie center nuts (also offered separately).

The 14" air cleaner kits are supplied with 3" tall filter GM P/N 6421746 (AC P/N A212CW). For buyers wishing a taller (4-1/32") filter, purchase GM P/N 8997189 (AC P/N A697C). The bases of the 14" air cleaner kits are recessed for a low profile appearance, maximum performance and hood clearance.

**Technical Note:** After installing a new air cleaner kit, always lower the hood slowly to confirm sufficient clearance visually. Minimum clearance of 3-3/4" is required from the top of the carburetor gasket area to the underside of the hood.

## HARMONIC BALANCER COVERS

**PATENTED!**

These patented harmonic balancer covers offer improved readability, more stable Top Dead Center indication and timing accuracy, enhanced appearance for a previously ignored underhood area, and the elimination of timing tapes which are inevitably flung off. They are available in chrome and black, resulting in parts with the appearance of \$200 balancers.

Each cover is distinctively marked with the famous Bowtie Emblem, Top Dead Center and the proper timing degrees. Using this cover improves timing accuracy because over time the etched under inertia ring of a typical harmonic balancer may slip in relation to the center hub of the balancer, causing the etched markings to provide an inaccurate indication of Top Dead Center for the #1 piston. Mounted directly through the center hub, this cover eliminates the affect of any outer inertia ring slippage. Aluminum. U.S. Patent 5,675,078.

**NEW!**

### The PROFORM® Street Carb Includes:

Based on the wildly successful Race Series carburetors the new PROFORM street carburetors are constructed of light weight aluminum, including provisions for a choke assembly and changeable idle air bleeds for easy non-permanent calibration changes if needed. Conventional service and tuning components are available in most performance retail outlets.

You'll also find the popular billet throttle body for superior strength, coupled with precision throttle shafts to ensure long term performance. All PROFORM carburetors have easy access adjustable secondary air flow. Other carburetors require special tools or removal of the carburetor to accomplish this simple adjustment.

The package is completed with high quality, light weight die-cast aluminum fuel bowls with fuel level windows for quick visual reference. Float level changes do not require removal of a sight plug with the risk of fuel spilling all over the top of your engine. Bowls come equipped with 3/8" inverted flare fuel inlet fittings and will except all conventional dual feed fuel lines compatible with Holley® four barrel carburetors.

Like all PROFORM™ carburetors, service parts are readily available however, should you not find PROFORM™ service parts, our carburetors are compatible with any modular carburetor service parts available at your local parts store or favorite retail outlet.

## Ford HEI Street/Strip Distributors, 100% NEW!

Fits Ford 289 - 302 (5.0). Utilizing the durable and dependable High Energy Ignition (HEI) system pioneered by GM, these distributors avoid the unsightly wiring of stock Ford electronic ignition systems by installing this one-piece distributor with an internally positioned coil and module. Easy to install: just connect one 12-volt hot wire to the distributor (has optional tach hook-up). These units offer calibrated advance curves that are optimized for maximum combustion efficiency and for the elimination of detonation damage and throttle ping. Assembled from precision-made parts for advance curve smoothness. Offers longer term durability and a higher voltage spark that permits a bigger spark plug gap, resulting in more power and reduced plug fouling. Each unit includes a high-power coil, a premium hi-dielectric cap with brass terminals, and a low-saturation ignition module. By eliminating the stock-Ford ballast resistor, more ignition voltage results in improved spark. Incorporates easily found High Energy Ignition (HEI) replacement parts. Assembled with upper and lower bushings (stock Ford distributors have only a single bushing).

## No-Mess Oil Pan Drain Plug -Patented

The PROFORM engine oil drain plug has a unique, patented, rubber extension which acts as a sealing "cork" when changing engine oil. As the drain plug is unscrewed and loosened, the "cork" seals the threaded drain hole, reducing mess and contact with hot oil. A firm tug releases the oil when desired. This plug minimizes the chance of a plug being dropped. U.S. Patent 5,547,042.
