

PERTRONIX

PERFORMANCE PRODUCTS

*Quality Products
for Over 40 Years*

2007

We are pleased to present our 2007 ignition catalog!

A special thanks to our loyal customers who continue to support PerTronix performance brands!

We are the world leader in the point replacement business, with our popular Ignitor® and Ignitor II electronic ignition systems, offering significantly more applications than all of our competitors combined. We encourage you to review the ever expanding Ignitor section. Visit the “New Products” section for many new Flame-Thrower® Billet Distributor offerings and information about our HV E-Core 60,000 volt coil.

In 2005 PerTronix purchased the assets of Doug’s Headers. We are continuing Doug’s 50 year tradition of building the highest quality, best fitting headers, that provide maximum engine performance. Please see the back inside cover of this catalog for a list of all the PerTronix performance brands, including Doug’s Headers, Patriot Exhaust Products and Thunderbird Exhaust Products. Visit our website at www.pertronix.com for more information.

Performance

The PerTronix sponsored Hairston Motorsports and Racing Pro Street Camaro is one of the hottest cars to compete in The Pacific Street Car Association. This awesome twin turbo powered '72 Camaro clips off mid 6 second passes at well over 215 mph. Visit www.pertronix.com and follow the cars performance.

New Products For 2007

Flame-Thrower® Billet Distributors

You asked for it and we built it. Our incredibly popular Billet Plug n' Play distributors are available for popular Ford and Mopar power plants. We've also added applications for type 1 VW engines. Our billet distributors feature patented Ignitor® II electronics with adaptive dwell control. Check out page 38 for more details.

Distributors for Type 1 engines

Has the distributor in your beetle, buggie, bus, or VW powered sand rail seen better days? We now have an electronic distributor for the ever so popular type 1 engines that won't break the bank. These all new distributors feature a performance advance curve that will liven up your engine. Turn to page 43 for more details.

60,000 Volt Flame-Thrower® HV Coil

Our family of Flame-Thrower coils just got a BIG brother. Flame-Thrower HV coils are capable of producing a staggering 60,000 volt spark. These coils use an E-core design for efficiency and a vacuum potted body for reliability. Our coil listings start on page 50.

Distributors for BMC engines

Call it a dizzy, or call it a distributor, one thing is for certain, our new products for British engines mean performance. We now have all new electronic distributors for the A and B series as well as 6 cylinder British engines. We've even developed an HP version which utilizes our patented Ignitor II electronics with adaptive dwell control. Read more on page 44.

Ignitor® and Ignitor II Applications

Everyone knows that we are the King of the electronic ignition conversion business. Well we haven't stopped expanding our Ignitor and Ignitor II applications. In this catalog you'll find new applications for Ferrari's, Fiat's and well... the list goes on. If you have a point set in your distributor, then chances are we have a conversion for you.

New Products

**NEVER
CHANGE
POINTS
AGAIN!**

IGNITOR®

Electronic Ignition

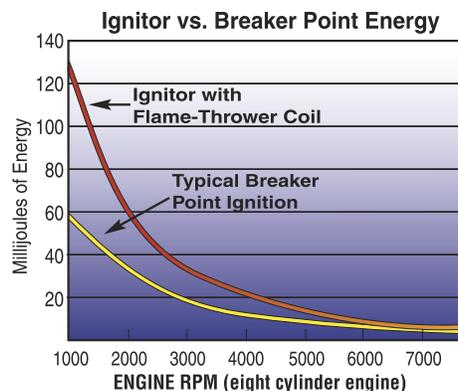

For over thirty years, the Ignitor has proven itself in applications ranging from race cars to tractors. The Ignitor replaces breaker point and troublesome factory electronic ignitions with a dependable, self contained and maintenance free electronic ignition system. The Ignitor has been called the "stealth" ignition because of its quick installation and nearly undetectable presence under your distributor cap.

Temperature Range: -50° to 300° F.
RPM Range: 0 to 15,000 RPM.

FEATURES

- Delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy, and spark plug life.
- 2:1 improvement over "points" in current fall time for increased coil output.
- Rotating cobalt magnets trigger a Hall Effect integrated circuit ...no points to burn, ...no moving parts to wear out.
- Epoxy molding makes our module impervious to dirt, oil, grease and moisture.
- Fits entirely inside the distributor. No "black box" to clutter the engine compartment.
- Stable timing ...no need for any adjustments.
- Will trigger most multi-spark CD ignitions.
- Use with Flame-Thrower® 40,000 volt coil for optimal performance.
- Available for 6 and 12-volt negative and positive ground systems.
- Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-2).
- Guaranteed for 30 months... We Stand Behind It!

Ignitor® II

Electronic Ignition

The Ignitor II has many of the same great feature that the Ignitor has, but its smarter. Ignitor II units sense the coil current level and use a powerful micro controller to adjust the dwell. Variable dwell helps to maintain peak energy throughout the entire RPM range.

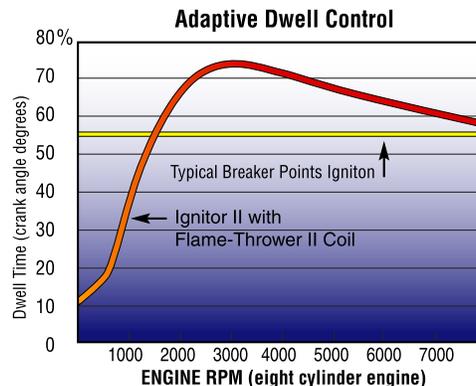

Ignitor II systems develop up to 4 times more energy between 3000 and 5000 RPM than standard ignition systems. High RPM performance is improved when used with the Flame-Thrower II super low resistance (0.6 ohms) 45,000 volt coil.

Temperature Range: -50° to 300° F.
RPM Range: 0 to 15,000 RPM.

FEATURES

- Adaptive dwell maintains peak energy throughout the entire RPM range, reducing misfires while improving engine performance.
- Develops on average 4 times more available energy between 3000 and 5000 RPM, and 2 times more available plug voltage.
- Peak current level is reached just prior to spark for maximum energy without the heat build-up, increasing coil and module life.
- Adjusts spark timing at higher RPMs to compensate for the inherent electronic delay.
- Senses startup and develops more energy for quicker, easier starting.
- Built in reverse polarity and over current protection shuts down the system, preventing component damage.
- Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-2).
- Guaranteed for 30 months... We Stand Behind It!

IGNITOR® / Ignitor® II

Automotive Applications

We have gone to great effort to insure the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits.
- Applications are based on the vehicle's original equipment.
- Read all footnotes before ordering.
- Some applications are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.

FOOTNOTES

- | | | |
|--|---|--|
| 1 Excluding California models | 20 Large cap distributor | 56 Also available in positive 6-volt polarity, add P6 to part number |
| 2 Factory electronic ignition | 23 Front mount distributor | 57 Also available in positive 12-volt polarity, add P12 to part number |
| 5 Canadian models only | 27 Screw down cap | 59 Single distributor applications |
| 8 Single point distributor | 28 Clip down cap | 60 Dual distributor applications |
| 10 Dual point distributor | 31 Remote mount coil conversion kit included | 61 Kit contains one module for each distributor |
| 13 Lobe sensor module | 33 Vacuum advance distributor | 62 With six lobe point cam |
| 14 European models only | 34 Non vacuum advance distributor | 63 With four lobe point cam |
| 15 Excluding lean burn computer controlled engines | 35 Special keeper no. MR-122K required for distributors without distributor cap | 64 With three lobe point cam |
| 16 Mechanical advance under breaker plate | 54 Excluding 239 cid. engines | 68 Overhead view of holley distributor shaft  |
| 17 Small cap distributor | 55 Also available in negative 6-volt polarity, add N6 to part number | 69 Overhead view of motorcraft distributor shaft  |
| 19 Mechanical advance at top of shaft | | |

IGNITOR® / Ignitor® II

Applications for Aftermarket Distributors

Not getting the performance you expected out of your "brand name" points distributor? Tired of replacing expensive burnt-out optical modules? Then you have come to the right place. Chances are PerTronix makes a replacement Ignitor or Ignitor II kit that will improve reliability and increase your ignition performance.

IGNITOR® / Ignitor® II

Applications by Distributor Number

We have Ignitor and Ignitor II kits that are made to fit specific distributor types and part numbers. Many of these kits are not tied to a particular vehicle application. If you can't find what you need in the application section of our catalog, use this look up. If its not here, that doesn't necessarily mean that we don't have it. If you are interested in a kit for a specific distributor please call (909) 599-5955.

Ignitor / Ignitor II Service Parts

Ignitor and Ignitor II replacement module parts are available separately. To order a module kit, add a "0" suffix to the original kit part number. To order a magnet sleeve kit, add a "3" suffix to the original kit part number. Most module adapter plates are stamped with the kit part number.

Replacement Module and Magnet Sleeve Kits

EXAMPLE:

Original Part Number: **1281**
 Replacement Module: **12810**
 Replacement Magnet Sleeve:..... **12813**

Some Ignitor and Ignitor II kits are provided with a rotor to insure proper magnet sleeve engagement. The following kits have replacement rotors available:

Replacement Rotors

1361A, 1381A, CH-161, CH-181, 91361A, 91381A, 9CH-161, 9CH-181	1361AR
1581, 91581	1581R

- 13 Lobe sensor module
- 32 Vacuum retard distributor
- 33 Vacuum advance distributor
- 45 With red fixed points

- 46 With blue sliding points
- 47 Vacuum retard & advance distributor
- 52 Fires every 90 degrees
- 53 Distributor made in England
- 56 Also available in positive 6-volt polarity, add P6 to part number
- 57 Also available in positive 12-volt polarity, add P12 to part number

- 70 Early DM2 distributor
- 71 Late DM2 distributor

IGNITOR® / Ignitor II®

Marine Applications

We have gone to great effort to insure the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits.
- Applications are based on the vehicle's original equipment.
- Read all footnotes before ordering.
- Some applications are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.

FOOTNOTES

- 10 Dual point distributor
- 26 Excluding distributor number YL670AV
- 27 Screw down cap
- 28 Clip down cap
- 55 Also available in negative 6-volt polarity, add N6 to part number
- 56 Also available in positive 6-volt polarity, add P6 to part number
- 57 Also available in positive 12-volt polarity, add P12 to part number
- 58 OMC; Stringer, Cobra and King Cobra applications with Electronic Shift Assist may require slight wiring modification.

IGNITOR® / Ignitor® II

Industrial Applications

We have gone to great effort to insure the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits.
- Applications are based on the vehicle's original equipment.
- Read all footnotes before ordering.
- Some applications are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.

IGNITOR® / Ignitor® II

Agricultural Applications

We have gone to great effort to insure the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits.
- Applications are based on the vehicle's original equipment.
- Read all footnotes before ordering.
- Some applications are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.

Flame-Thrower®

'Plug n Play' Billet Distributors

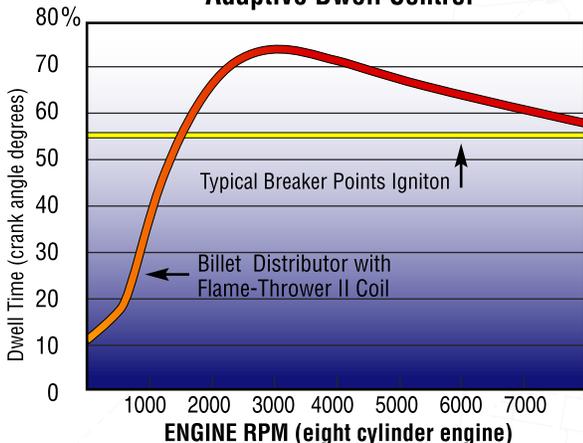

Plug 'n play billet distributors are designed for maximum ignition performance and easy installation all at a price that you can afford. Replace your outdated points or electronic distributor with this performance proven distributor and which features the patented Ignitor® II electronics and a CNC machined 6061 T-6 polished billet housing.

FEATURES

- Integrated patented Ignitor II technology with adaptive dwell control.
- Cobalt magnets and Hall Effect trigger for stable timing and precise spark distribution.
- A powerful micro controller with adaptive dwell algorithms constantly adjust the dwell angle to maintain peak energy throughout the entire RPM range for increased high and low RPM performance.
- Ignitor II compensates for inherent electronic delay by adjusting the spark timing throughout the entire RPM range.
- Synchronized peak current and spark timing reduces heat build-up.
- Precision CNC machined billet housings are polished to a high luster.
- Tempered distributor shafts have low torsion displacement for accurate timing and longer life.
- Upper ball bearing and extra long oil impregnated bronze lower bushing work together to reduce friction and high RPM vibration.
- Precision stamped advance weights eliminate erratic timing.
- Adjustable mechanical advance with proprietary limiting functions permits multiple settings. Distributors are factory set with a performance advance curve and are provided with additional springs for custom advance curves.
- High dielectric strength cap with male or female brass terminals and premium rotor with brass contact.
- Compatible with most Capacitive Discharge Systems.
- Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-12)*
- Warranty: 30 months electronics / Limited 1 year mechanical.

Adaptive Dwell Control

For non-computer controlled vehicles.

* Non vacuum advance distributors do not have an E.O. number and are not legal for sale or use on pollution controlled motor vehicles.

--	-------------------------------	------------------------------

Volkswagen Type 1 air cooled engines		
Our new plug 'n play billet distributors for VW engines feature our Ignitor® and Ignitor II electronics. These distributors use male terminal caps and require different spark plug boots and terminals. Check out our custom 8mm wire sets for VW engines on page 57.		
Non Vac adv. distributor with Ignitor electronics	D186810	D186813
Non Vac adv. distributor with Ignitor II electronics	D180810	D180813

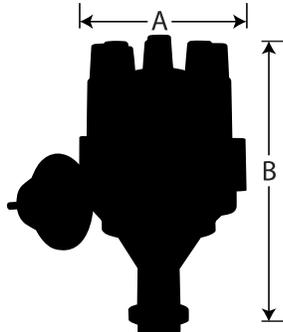

* Non vacuum advance distributors do not have an E.O. number and are not legal for sale or use on pollution controlled motor vehicles.

For non-computer controlled vehicles.

Distributors

Billet Distributor Dimensions

Flame-Thrower billet distributors are frequently used in tight engine compartments due to their Plug n' Play design and relatively small size. The chart below details approximate distributor dimensions for each engine family. The height dimension "A" is taken from the installed surface to the highest point on the distributor cap. Although our distributors fit their intended engine application, each vehicle application must be evaluated independently to insure adequate space for distributor fitment as well as air cleaner and hood clearance.

Application	Dim. A	Female Cap Dim. B	Male Cap Dim. B
Chevrolet SB & BB	5"	7.66"	8.38"
Chrysler 273, 318, 340 & 360	5"	7.82"	8.54"
Chrysler 383 & 400	5"	7.80"	8.56"
Chrysler 413, 426 & 440	5"	7.80"	8.56"
Ford 221, 260, 289 & 302	5"	7.77"	8.49"
Ford 351W	5"	8.60"	9.32"
Ford 332, 352, 360, 390, 406, 410, 427, 428FE	5"	8.41"	9.13"

Flame-Thrower®

Street / Strip HEI Distributors

Flame-Thrower HEI distributors are built from the ground up with all new components. We have engineered a special module and coil combination that operates without misfires beyond 7500 RPM. That's nearly 3000 RPM higher than most original HEI distributors.

Flame-Thrower HEI distributor produce 67% more energy with a 45% faster spark breakdown time when compared to the stock HEI. This means twice the energy to the spark plugs. Our tests show that with these improvements wider plug gaps can be used resulting in an increasing flame kernel growth for more efficient combustion.

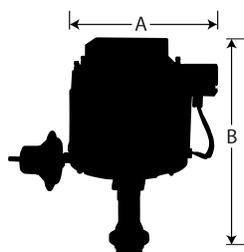

FEATURES

- New lightweight A384 cast aluminum alloy housing.
- Aligned and honed high quality bronze sintered bushings for reduced friction and extended life.
- Centerless ground corrosion resistant shaft reduces friction and provides concentric operation.
- Distributor gear is ground to exact tolerances for tighter mesh with cam.
- High dielectric strength cap with solid brass terminals and low resistance center coil brush.
- Balanced rotor with nylon screws prevent arcing and reduce vibration at high RPMs.
- Adjustable vacuum advance canister and high performance advance curve.
- Precision machined chromoly advance weights and center plate eliminate erratic timing .
- Meets stringent automobile susceptibility, vibration and shock requirements.
- Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-5)
- Limited One Year Warranty.

For non-computer controlled vehicles

Distributors

Flame-Thrower®

Race HEI Distributors

Race HEI units use all new components and feature an electronic module and coil combination that optimizes spark energy and peak current to the spark plug in the 6000 to 8500 RPM range.

Compared to our street/strip version, race units produce 42% more energy with 46% faster spark breakdown time allowing 48% more peak current to reach the spark plug. This abundant energy doubles the spark intensity during the critical one millisecond of burn time.

Great for both circle track and drag race applications where factory type HEI distributors are mandated.

FEATURES

- New lightweight A384 cast aluminum alloy housing.
- Aligned and honed high quality bronze sintered bushings for reduced friction and extended life.
- Centerless ground corrosion resistant shaft reduces friction and provides concentric operation.
- RACE ONLY 7.2 amp module and 50,000 volt coil.
- Distributor gear is ground to exact tolerances for tighter mesh with cam.
- High dielectric strength cap with solid brass terminals and low resistance center coil brush.
- Balanced rotor with nylon screws prevent arching and reduce vibration at high RPMs.
- Specially designed vacuum lockout prevents changes to rotor phasing to maximize combustion burn time at high RPMs.
- Tig welded rotor and advance plates prevent high RPM distortion while improving reliability.
- Precision machined chromoly advance weights and center plate eliminate erratic timing .
- Additional advance springs included for fine tuning the advance curve to your needs.
- Limited One Year Warranty.

For non-computer controlled vehicles.

Not legal for sale or use on pollution controlled motor vehicles.

Flame-Thrower®

HEI / EST Distributor

Performance EST (Electronic Spark Timing) distributors for GM late model computer controlled applications dramatically improves high RPM performance. When teamed up with our Flame-Thrower E-core coil, spark plug voltage is increased by more than 40%. This distributor is a direct drop-in replacement for most 1987-1993 GM cars and 1987-1995 trucks.

FEATURES

- New lightweight A384 cast aluminum alloy housing.
- Aligned and honed high quality bronze sintered bushings for reduced friction and extended life.
- Centerless ground corrosion resistant shaft reduces friction and provides concentric operation.
- Distributor gear is ground to exact tolerances for tighter mesh with cam.
- Ignition module uses thick film technology for greater accuracy and improved reliability. Each unit is laser trimmed for precise peak current control.
- High dielectric strength cap with solid brass terminals.
- Meets stringent automobile susceptibility, vibration and shock requirements.
- Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-13)
- Limited One Year Warranty.

Flame-Thrower®

Performance Distributors for British Engines

These distributors are built using all new castings modeled after the 45D series distributor. Each distributor is then precision machined for an exact fit. Replace your faulty factory Lucas electronic or worn out 23D, 25D and 45D point distributor with a distributor that will deliver the performance you demand.

FEATURES

- Tailored advance curve for optimal performance and driveability.
- Delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy, and spark plug life.
- 2:1 improvement over "points" in current fall time for increased coil output.
- Rotating cobalt magnets trigger a Hall Effect integrated circuit. ...no points to burn, ...no moving parts to wear out.
- Epoxy molding makes our module impervious to dirt, oil, grease and moisture.
- Stable timing ...no need for any adjustments.
- Use with Flame-Thrower 40,000 volt coil for optimal performance.
- Available for 12-volt negative and positive ground systems.
- Warranty: 30 months electronics / limited 1 year mechanical.

Not legal for sale or use on pollution controlled motor vehicles.

Flame-Thrower®

HP Distributors for British Engines

HP stands for High Performance, and that's what you get with our all new HP distributor for British engines. These distributors feature patented Ignitor II technology and a high dielectric strength cap with solid brass terminals.

FEATURES

- Tailored advance curve for optimal performance and driveability.
- Variable dwell maintains peak energy throughout the entire RPM range, reducing misfires while improving engine performance.
- Develops on average 4 times more available energy between 3000 and 5000 RPM, and 2 times more available plug voltage.
- Peak current level is reached just prior to spark for maximum energy without the heat build-up, increasing coil and module life.
- Adjusts spark timing at higher RPMs to compensate for the inherent electronic delay.
- Senses startup and develops more energy for quicker, easier starting.
- Built in reverse polarity and over current protection shuts down the system, preventing component damage.
- Warranty: 30 months electronics / limited 1 year mechanical.

Not legal for sale or use on pollution controlled motor vehicles.

Flame-Thrower®

Performance Distributors for Type 1 Engines

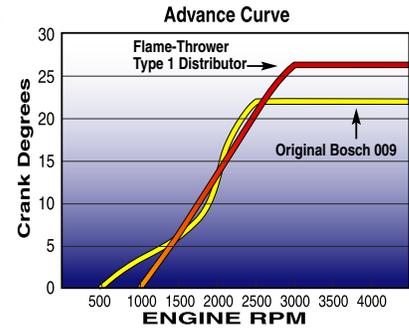

Now you can get a quality distributor that delivers excellent performance and doesn't break the bank. We've taken all the things that you like about the Bosch 009 distributor, and the performance capabilities of the 010 and 050 distributor and designed them into our all new Flame-Thrower distributor. To top things off this distributor features integrated Ignitor electronics.

Not legal for sale or use on pollution controlled motor vehicles.

FEATURES

- Custom mechanical advance curve for optimal performance and driveability.
- Delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy, and spark plug life.
- 2:1 improvement over "points" in current fall time for increased coil output.
- Rotating cobalt magnets trigger a Hall Effect integrated circuit. ...no points to burn, ...no moving parts to wear out.
- Epoxy molding makes our module impervious to dirt, oil, grease and moisture.
- Stable timing ...no need for any adjustments.
- Use with Flame-Thrower Performance coil. See page 48.
- Available for 12-volt or 6-volt negative ground systems.
- Warranty: 30 months electronics / limited 1 year mechanical.

Flame-Thrower®

Marine 'Plug n Play' Billet Distributors

Plug 'n play billet distributors are designed for maximum ignition performance and easy installation all at a price that you can afford. Our Flame-Thrower Marine Billet distributors share many of the performance features that you find in our automotive versions. Marine approved distributors are designed to meet SAE J1171 standards.

FEATURES

- Integrated patented Ignitor II technology with adaptive dwell control.
- Upper ball bearing and extra long oil impregnated bronze lower bushing work together to reduce friction and high RPM vibration.
- Adjustable mechanical advance with proprietary limiting functions permits multiple settings. Distributors are factory set with a performance advance curve and additional springs are provided for custom advance curves.
- Warranty: 30 months electronics / limited 1 year mechanical.

Flame-Thrower®

Performance Ignition Modules

Our performance ignition modules are direct replacements for popular GM and Ford computer controlled distributors. These modules provide enhanced high RPM performance and when used with their corresponding Flame-Thrower coil, increase spark plug voltage by more than 40%.

FEATURES

- Thick film technology on alumina ceramic substrates removes heat for greater accuracy and improved reliability.
- Laser trimming gives precise peak current control for increased energy output.
- Each module is tested twice with automated equipment to insure trouble free operation.
- Legal in all 50 states and Canada*.(C.A.R.B. E.O. #D-57-15)
- Limited One Year Warranty.

Flame-Thrower 50,000 E-core Coil

An ignition system is only as good as its weakest link. Replace your weak stock coil with our Flame-Thrower 50,000 volt E-core coil to maximize your system performance. This coil is the perfect companion to our EST distributors and replaces the factory coil.

Flame-Thrower®

HEI Distributors Accessories

Complete Tune-up Kits

Everything you need to "wake up" your stock Chevy, Olds, Pontiac, Cadillac or Buick distributor. Kits include street-strip 4-pin module and coil combination, premium rotor and cap, custom Flame-Thrower coil cover, adjustable vacuum advance canister, hi-performance advance kit, wire harness and capacitor, and complete installation hardware.

	Black Part No.	Red Part No.	Blue Part No.
Chevrolet and Cadillac V8 black cap (red/yellow wire coil)	D8000	D8001	D8002
Buick, Oldsmobile, Pontiac and Corvette (red/white wire coil)	D8010	D8011	D8012

"Race Only" tune-up kits bring HEI equipped circle track or drag race engines back to life. Kits include matching coil and module, wiring harness, vacuum lock out, advance weights, springs, bushings, cap, rotor, dust shield, and necessary hardware.

Race Only Tune-Up Kit	D8070*	D8071*	
-----------------------	--------	--------	--

Caps, Rotor and Dust Covers

Made from hi-performance 60 KV rated alkyd molding compound for superior protection from "arc-thru" and cross-fire. Includes nylon rotor hold-down screws. Our Flame-Thrower dust cover has a larger air gap which promotes cooler coil temperatures.

Distributor Cap and Rotor Kits	D4000	D4001	D4002
Distributor Cap	D4050	D4051	D4052
Distributor Rotor		D4061	D4062
Dust Cover with Flame-Thrower Script	D9000		

High Performance Modules

	Part No.
4-pin HEI module Street-Strip 6.9 AMP	D2000
4-pin HEI module Race Only 7.2 AMP	D2070*

Flame-Thrower 50,000 Volt Coils

HEI Street/Strip coil, red/yellow wire 0.50 Ohm	D3000
HEI Street/Strip coil, red/white wire 0.50 Ohm	D3001
HEI Race Only coil, 0.35 Ohm	D3070*

Wiring Harness and Capacitor

Premium quality wire harness and capacitor insure good connection and "static free" operation.

Harness and Capacitor	D9007
-----------------------	-------

Adjustable Vacuum Advance Canister

This canister allows you to optimize ignition advance for maximum part throttle performance and cruise speed efficiency.

Adjustable Vacuum Advance Canister	D9006
------------------------------------	-------

Vacuum Advance Lockout

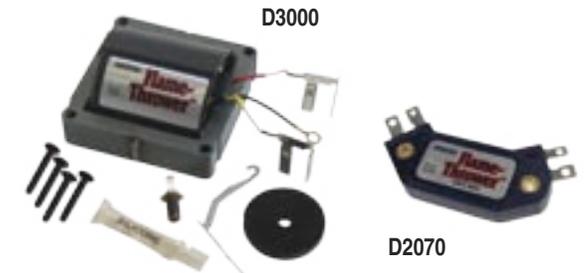

Lockout for Clockwise rotating distributors	D9010
Lockout for Counterclockwise rotating distributors	D9011

Performance Advance Curve Kit

Precision machined chromoly weights and center plate eliminate erratic timing. Three sets of springs, guide bushings and complete installation instructions make recurving your distributor easy.

Advance Curve Kit	D9001

* Not legal for sale or use on pollution controlled motor vehicles

Tune-Up Parts

Flame-Thrower®

40,000 Volt Coils

While it's the perfect coil to go with the PerTronix Ignitor breakerless ignition, our 40,000 volt Flame-Thrower canister coil can benefit virtually any distributor type inductive system. Its higher voltage allows larger spark plug gaps for added power, smoother response and better fuel economy. These coils are internally resisted so they are compatible with many ignition systems. Our oil filled coils offer great heat control for street driven vehicles, while our epoxy filled coils provide superior winding support for high vibration environments in offroad vehicles and boats.

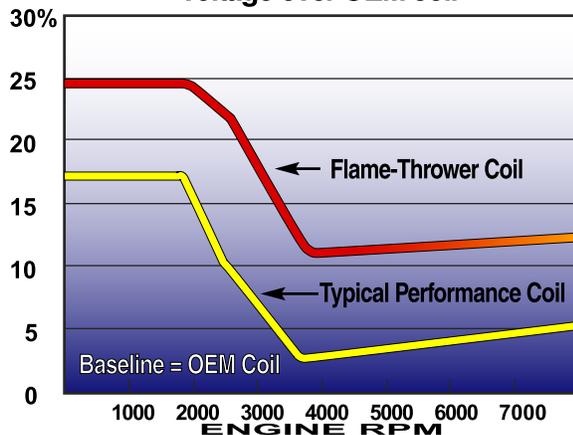

FEATURES

- 40,000 volts
- Available chrome plated or black for that "stock look".
- For use with inductive ignition systems.
- 1.5 or 3.0 Ohm primary resistance values available.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-10)
- Warranty: 90 Days

Ignition Coils

Percent of extra available voltage over OEM coil

Eight cylinder engine with PerTronix Ignitor installed.

Flame-Thrower II[®]

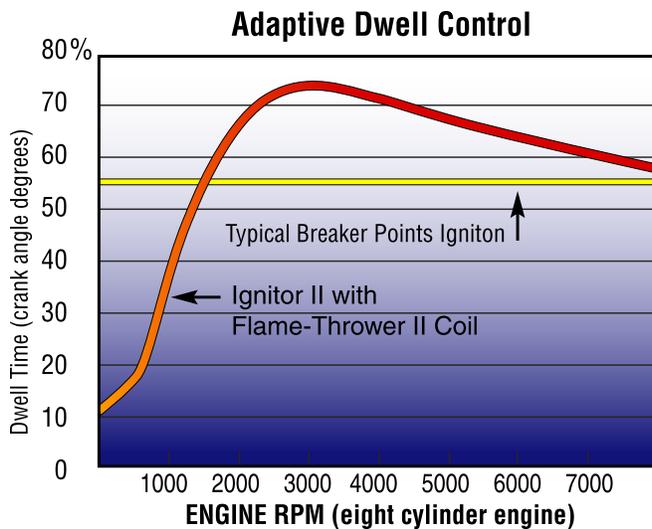

45,000 Volt Coils

Flame-Thrower II coils feature a super low resistance which make them the ideal coil for Ignitor II ignition systems as well as many other high energy ignitions. Low resistance and improved turns ratio help to produce up to 45,000 volts. This higher voltage enables you to run larger spark plug gaps for added power and better fuel economy. These coils are also compatible with most capacitive discharge boxes including our own Second Strike.

FEATURES

- 45,000 volts
- Available chrome plated or black for that "stock look".
- For use with inductive or CD ignition systems.
- Super low 0.6 Ohm primary resistance.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-10)
- Warranty: 90 Days

Flame-Thrower HV

60,000 Volt Coils

Our new HV (high voltage) E-core design yields an incredible 60,000 volts and operates with no degradation throughout temperature ranges that surpass military specifications. The special heat sink design made from aircraft 6063 T5 aluminum efficiently transfers heat optimizing energy output for street/strip and off road applications. Flame-Thrower HV .046 ohm coils are also compatible with most capacitive discharge boxes including our own Second Strike.

FEATURES

- 60,000 volts
- Available in three primary resistance values.
- Highly efficient E-core design.
- Vacuum potted coil body for longer life and increased reliability.
- Precision machined male high tension terminal and brass primary terminals.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-10)
- Warranty: 90 Days

Flame-Thrower®

50,000 Volt E-core Coils

Our Flame-Thrower E-Core coils feature optimized winding design to maximize spark gap current and available voltage. When teamed with the Flame-Thrower module they produce 100% more energy across the spark plug gap (during a one millisecond burn time) compared to the OEM coil. Select one of our matching Flame-Thrower modules for a performance proven combo. See page 45-46.

FEATURES

- 50,000 volts
- Ultra low primary resistance values.
- Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-6)
- Warranty: 90 Days

Second Strike[®]

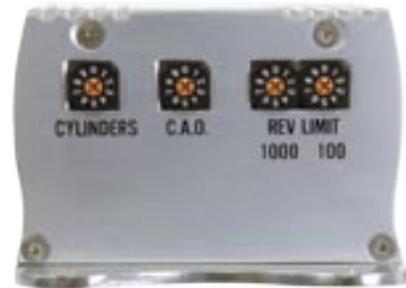

The Ultimate Ignition Supplement!

Second Strike is the only ignition system to provide a powerful second spark throughout the entire RPM range. Other multiple spark discharge systems typically drop off to one spark at about 3000 RPM. The "Second Strike" is a microcontroller based ignition supplement that works with most inductive type systems (points, GM HEI, Chrysler electronic ignition, Ford TFI and Duraspark, Ignitor and Ignitor II). Following the primary spark, the Second Strike delivers a powerful capacitive discharge second spark resulting in a more complete combustion. At very high RPM's the increased burn time can reduce misfires resulting in more peak horsepower and torque.

Second Strike's unique crank angle offset (CAO) feature gives you tunability that no other box has. Simply turn the dial and change the time, in crank angle degrees, that the second spark occurs. A wide range of adjustment (2° to 18°) gives you the flexibility to find the CAO that works best for your engine's performance and your driving type.

An integrated digital rev limiter protects the engine from over rev conditions. A combined random and sequential spark stealing method provide superior control of rev limits and a rapid response time to over rev limit events. Read more about the rev limiting features on the next page.

Easy installation with a simple five wire hookup and detailed instructions. No special distributor or coil are required.

FEATURES

- Only system to provide a second spark throughout the RPM range.
- Powerful CD second spark resulting in more complete combustion.
- Increased burn time makes more horsepower and torque at high RPMs.
- Unique (CAO) feature adjusts the timing of the second spark.
- Built-in digital rev limiter with high resolution.
- Digital rotary switches permit easy adjustment.
- Adaptive voltage feature prevents overdriving the ignition coil.
- Voltage protection prevents damage from reversed polarity.
- Tachometer output with TTL interface and near 50% duty cycle make our limiters compatible with most modern tachometers.
- Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-9).
- Limited One Year Warranty.

SPECS.

Spark Energy Capability:	250MJ
Primary Voltage:	Adaptive 200-800 Volts
Spark Timing:	Adjustable 2°-18° of crank rotation
Voltage Required:	9 - 18 Volts
Current Draw:	0.8 amps / 1000 RPM
Size:	6"L X 4"W X 3"H
Weight:	2.3 LBS.

Second Strike

For use with 12 volt negative ground, 4, 6 or 8 cylinder, even fire engines with single coil inductive ignition systems. (excludes computer controlled vehicles).....

Part No.

500

Digital REV Limiter

Fool Proof Control...

Flame-Thrower digital rev limiters work with any 4, 6 or 8 cylinder engine using points, OEM electronic (GM HEI, Ford, Chrysler) or aftermarket inductive type ignition systems including our very popular Ignitor and Ignitor II points replacement systems.

This digital microcontroller based unit provides a much greater accuracy (+/-0.01%) over analog systems. There is no need for old resistor style pills or chips, our easy to use rotary switches adjust the RPM limit to an ultra fine resolution of 100 RPMs. Combined random and sequential spark stealing method provide superior control of rev limits and a rapid response time to over rev limit events, preventing engine failure. Once the established RPM limit is reached, random spark stealing starts within one spark, reducing plug fouling common with repetitive stealing type limiters. Rev limiters come with multiple analog filters and one digital filter to prevent coil noise interference from affecting the established rev limit.

Installation is a snap with a four wire hookup and easy to understand instructions. The rev limiter's small size permits intallation in even the most crowded engine compartment.

FEATURES

- Digital microcontroller based unit provides greater accuracy (+/-0.01%) over analog systems.
- Easy to use rotary switches permit settings with a resolution of 100 RPMs.
- Combined random and sequential spark stealing method.
- Tachometer output with TTL interface and near 50% duty cycle make our limiters compatible with most modern tachometers.
- Reverse voltage protection.
- Easy four wire hookup.
- Compact size: 3"L X 2.5"W X 1.4"H
- Light weight: 0.75 LBS.
- Limited One Year Warranty.

**Not for use with
CD Ignition Systems.**

Digital Rev Limiter

Part No.

For use with 12 volt negative ground, 4, 6 or 8 cylinder, even fire engines with single coil inductive ignition systems..... 600

Flame-Thrower®

8mm MAGx2 Plug Wires

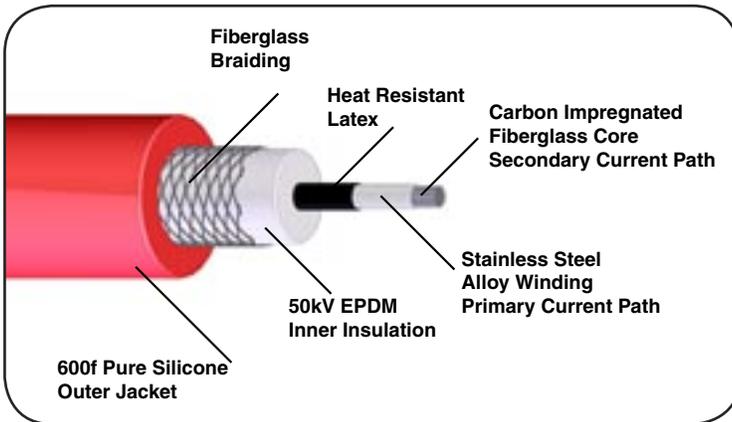

Make your engine stand out from the rest in looks and performance. Flame-Thrower 8mm MAGx2 wires deliver in more ways than one with dual current paths for reliability and redundancy. Low 500 ohm/foot rating gets more energy to the spark plug. Select a custom tailored set for out of the box fit or a universal kit to match your unique engine and wire loom configuration. All 8mm MAGx2 wires feature white "Flame-Thrower" script.

FEATURES

- Two current paths for reliability and redundancy.
 - Primary path:** Spiral wound stainless steel alloy.
 - Secondary path:** Carbon impregnated fiberglass center core.
- Low 500 ohm per foot resistance.
- 8mm Silicone jacket to resist high temperatures, moisture, oil and chemicals.
- EPDM (Ethylene Propylene Diene Methylene) rubber inner insulation for superior heat resistance and prevention of arcing and voltage leaks.
- Fiberglass reinforcing braid for added strength and flexibility.
- Lifetime Warranty.

Spark Plug Wires

Universal 8mm MAGx2 Wire Sets

Universal kits are available in 90°, 45° or straight spark plug boots ends. Kit include terminals to fit both male and female terminal distributor caps.

Description	Cylinders	Plug Boot	Dist. Boot	Black Part No.	Blue Part No.	Red Part No.

Flame-Thrower®

7MM "Stock-Look" Plug Wires

Now you can get a "stock-look" spark plug wire, that performs! We've designed these wires with the same core that we use in our 8mm wire. The only real difference is the 7mm flat black silicone jacket that hides its performance potential from the naked eye. Get the best of both worlds with "state-of-the-art performance and a stock look." These wires will fit most original wire looms. Select a custom tailored set for a great out of the box fit or a universal kit to match your unique engine and wire loom configuration.

FEATURES

- Two current paths for reliability and redundancy.
 - Primary path:** Spiral wound stainless steel alloy.
 - Secondary path:** Carbon impregnated fiberglass center core.
- Low 500 ohm per foot resistance.
- 7mm Silicone jacket to resist high temperatures, moisture, oil and chemicals.
- EPDM (Ethylene Propylene Diene Methylene) rubber inner insulation for superior heat resistance and prevention of arcing and voltage leaks.
- Fiberglass reinforcing braid for added strength and flexibility.
- Lifetime Warranty.

Universal 7mm Wire Sets

Universal 7mm "Stock-Look" spark plug wire kits featuring 90° or straight spark plug boots. Each universal set includes terminals to fit both male and female terminal distributor caps.

	Cylinders	Plug Angle	Dist. Angle	Part No.
7mm STOCK-LOOK UNIVERSAL.....	8	Straight	90°	708180
7mm STOCK-LOOK UNIVERSAL.....	8	90°	90°	708190

7mm "Stock-Look" Wire Sets

Our Custom "Stock-Look" 7mm wire sets are available for many of the most popular domestic car and truck applications. Custom wire sets are pre-terminated for a perfect fit, no cutting, crimping or splicing is needed.

Industrial Distributors

PerTronix is the leading producer of electronic distributors for gas, propane and LP powered industrial engines. Many Wisconsin and Continental engines are equipped with our industrial distributors from the factory. Proven performance, reduced maintenance downtime, improved economy, faster starts and extended tune-up intervals.

Our industrial distributors are also direct replacements for many point type Delco, and Prestolite distributors. Integrated Ignitor electronic ignition technology eliminates the need for points and condenser. The light weight yet durable distributor housings have a superior venting system and "O" ring seal to reduce oil leakage around the distributor. Each distributor comes with a non-tracking cap, rotor and dust cover.

FEATURES

- Integrated Ignitor technology.
- Epoxy encapsulated module protects against moisture, dust, dirt and oil.
- No external electronic "black box" required.
- Precision engineered to switch twice the energy of any other electronic ignition system.
- Timing remains constant with an amazing 1/4° accuracy all the way down to zero RPM.
- Temperature range -50 to 300° F with coil rise time of 25 microseconds over the entire temperature range.
- Effective RPM range of 0 to 6000.
- Non-tracking cap and rotor.
- Warranty: 30 months Ignitor module / 90 days mechanical.
