PARKING SENSOR SYSTEM

- * NR-600 Series parking sensor systems are the new generation design with dual CPU & 4 individual channels to detect obstacles behind vehicles.
- * NGD (No Ground-Detecting) Technology: the ultrasonic beam is of excellent flat shape, the obstacle lower than 1cm cannot be detected to offer more precise readings.
- * Unique ultrasonic resistance function can filter environmental ultrasonic wave effectively.
 - * System has sensitive adjustment feature to avoid false alarms.
- * All plugs are sealed in the control box; dustproof, waterproof, free of condensation and thus longer lasting.
 - * Universal control box can be connected to LED visual display.
