CLUTCH MASTERS HAS THE PERFECT BALANCE!

With more systems to choose from than any of our competitors, Clutch Masters has the ability to create a custom clutch package that delivers true matched performance. Please contact one of our Tech representatives for personal assistance in choosing the right setup for your application. **909.877.6800** www.clutchmasters.com

Clutchin' It Up... The facts!

Problem 1: Crank Walk

One of the major problems associated with high pedal pressure is the tendency to damage the crank thrust bearing, which allows "crank walk". Crank walk can lead to catastrophic engine failure.

The solution: Hi-Leverage Pressure Plate System

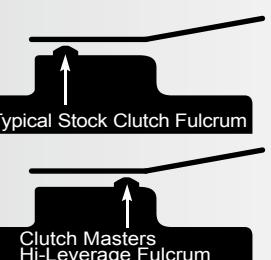

Through developing the Hi-Leverage system which significantly increases plate load while keeping excessive pedal pressure to a bare minimum, Clutch Masters has solved the problem of crank walk and premature thrust bearing failure. This technology has virtually eliminated the problems associated with clutch linkage, throw out bearing and hydraulic system failures.

Problem 2: Straps and Rivets

Straps are the structural component that connect the pressure plate to the pressure plate housing. Considering that all the horsepower and torque are transferred through these straps, it is critical that they hold up. Weak stock straps can cause deflection and failure under high stress conditions and heavy-duty applications.

The Solution: HD Straps

Clutch Masters uses HD straps that allow the pressure plate to maintain its precise alignment by providing a very strong connection with the housing. Many high-performance manufacturers neglect this crucial detail. By using HD straps, the pressure plate releases from the disc more quickly for more accurate shifting.

Steel Back Heavy Duty Street System

70% increase in holding capacity

The FX100 System uses the Power Plus I Pressure Plate with a custom heavy-duty Steel Back Organic friction disc. This clutch is engineered for heavy-duty street use. It is specifically designed for extended wear and additional clamping force for the enthusiast who has added an exhaust system, an intake system, up to 50hp NO2 upgrade, or other non-forced induction external bolt-ons. It features only slightly increased pedal pressure, longer life than stock, and normal clutch feel during engagement and disengagement for a very smooth operation.

Features of the FX100:

Power Plus I Pressure Plate

- Hi-Leverage Design
- Ductile Iron Casting*
- Precision Heat-Treated Single Diaphragm
- Re-Arched Diaphragm for Superior Disengagement
- Heavy-Duty Straps
- Improved Clamping Force
- Minimal Increase in Pedal Pressure

Heavy-Duty Disc

- Steel Back Organic Friction Material
- Heavy-Duty Sprung Hub
- Marcel Spring Wafer
- OEM or better Release Bearing
- Pilot Bearing*
- Alignment Tool
- Instruction Card*
- Decals

*When Applicable

Kevlar Steel Back System

70% increase in holding capacity

The FX200 System uses the Power Plus I Pressure Plate and a Steel Backed Kevlar disc. This clutch is designed for the street enthusiast or weekend racer. The FX200 offers similar torque holding capacity to the FX100, however, its life expectancy is increased 2-3 times with the Kevlar disc. Our Kevlar friction material is non-abrasive and doesn't score the mating surfaces. It features only slightly increased pedal pressure, significantly longer life than stock, and normal clutch feel during engagement and disengagement for the smoothest operation of any stage we offer.

Features of the FX 200

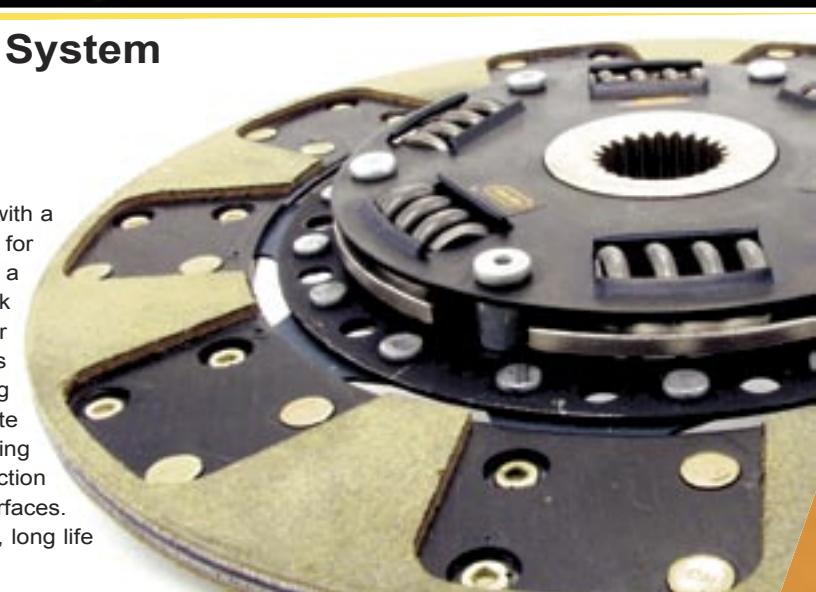

Power Plus I Pressure Plate

- Hi-Leverage Design
- Ductile Iron Casting*
- Precision Heat-Treated Single Diaphragm
- Re-Arched Diaphragm for Superior Disengagement
- Heavy-Duty Straps
- Improved Clamping Force
- Minimal Increase in Pedal Pressure

*When Applicable

Heavy-Duty Kevlar Disc

- Steel Backed Kevlar Friction Material
- Heavy-Duty Sprung Hub
- Marcel Spring Wafer
- OEM or better Release Bearing**
- Pilot Bearing***
- Alignment Tool**
- Instruction Card***
- Decals**

Segmented Kevlar SteelBack System

110% increase in holding capacity

Extra Long Life & Positive Response

The FX300 System uses the Power Plus I Pressure Plate with a Steel Back Segmented Kevlar disc. This clutch is designed for the ultimate street enthusiast or weekend racer running a normally aspirated car equipped with cylinder head work and/or hotter cam(s), or with medium-boost turbo or super-charger, or up to 100hp NO2. This combination has proven to be one of our most successful units. By combining the use of Kevlar friction in a segmented format, we create more pounds per square inch allowing more torque holding capacity while still delivering exceptional life. Our Kevlar friction material is non-abrasive and doesn't score the mating surfaces. The FX300 features only slightly increased pedal pressure, long life disc and positive engagement.

Features of the FX 300

Power Plus I Pressure Plate

- Hi-Leverage Design
- Ductile Iron Casting*
- Precision Heat-Treated Single Diaphragm
- Re-Arched Diaphragm for Superior Disengagement
- Heavy-Duty Straps
- Improved Clamping Force
- Minimal Increase in Pedal Pressure

Steel Backed Materials For Long Lasting Reliability!

Steel Backed Materials For Long Lasting Reliability!
Other manufacturers simply rivet the bare friction material to the disc. Clutch Masters takes it a step further and first bonds the friction material to a steel backing. This improves thermal dissipation and structural integrity, eliminating common shredding and decomposition. All FX100, FX200 & FX300 discs are manufactured this way!

Sprung Ceramic System

**170% increase in holding capacity
Ultra Heavy-Duty Street and/or Racing**

The FX400 System uses the Power Plus I Pressure Plate with a custom, extremely durable, Sprung Ceramic disc. This is the ultimate extreme duty street and/or road/drag racing system. It is available in a 4 or 6 wing (paddle) configuration, with the 4-wing being the more aggressive setup (please specify which type you prefer). The sprung hub design allows for moderate dampening in high-torque applications, rendering it much more streetable than solid or rigid designs. This disc is designed for long life, outstanding holding capacity, and rapid heat dissipation.

Warning: Due to the solid (no Marcel) friction rivet design, the FX400 disc engages very quickly and may chatter slightly in first and reverse. To help alleviate this problem, we only use premium ceramic friction material.

****AVAILABLE IN 4 AND 6 WING STYLES**

SFI APPROVED ON MOST RACE APPLICATIONS.

Features of the FX400:

Power Plus I Pressure Plate

- Hi-Leverage Design
- Ductile Iron Casting*
- Heavy-Duty Straps
- Precision Heat-Treated Single Diaphragm
- Re-Arched Diaphragm for Superior Disengagement
- Improved Clamping Force
- Minimal Increase in Pedal Pressure

*When Applicable

Sprung 4 or 6 Wing Ceramic Button Disc

- Premium Ceramic Friction Material
- Custom Heavy-Duty Sprung Hub
- No Marcel
- OEM or better Release Bearing**
- Pilot Bearing***
- Alignment Tool**
- Instruction Card***
- Decals**

Ceramic/Sintered Iron System*

**200-400% increase in holding capacity
Race Only**

The versatile FX500 System uses either the Power Plus I or Power Plus II Pressure Plate along with a solid center 4 or 6 wing (paddle) Ceramic Button disc. It is designed for maximum holding capacity with no compromises.

Warning: The FX500 is a Solid Hub (rigid) disc that engages and disengages instantly.

This is a Race Only clutch.

****AVAILABLE IN 4
AND 6 WING STYLES**

Sintered Iron*

Custom full drag race FX500 systems utilizing the Sintered Iron* friction material are designed for, and thrive, under the most extreme conditions. This system is custom built for the specific application. Please call with your special requirements for pricing and availability.

SFI APPROVED ON MOST RACE APPLICATIONS.

Features of the FX500:

Power Plus I Pressure Plate

- Refer to FX100-400

Power Plus II Pressure Plate

- Hi-Leverage Design
- Ductile Iron Casting*
- Heavy-Duty Straps
- Precision Heat-Treated Diaphragms (2 stacked)
- Special Friction Reducing Lubricant to Eliminate Diaphragm Binding
- Exceptionally High Clamping Force
- Heavy Pedal Pressure

*When Applicable

Solid 4 or 6 Wing Ceramic Button Disc

- Premium Ceramic Friction Material
- Solid Hub
- No Marcel

Custom Sintered Iron Disc*

- Sintered Iron Friction Material
- Solid Hub
- No Marcel

OEM or better Release Bearing

Pilot Bearing*

ALUMINUM FLYWHEEL
LOW PROFILE

PLATE

FLYWHEEL

Hi-Leverage Pressure Plates

Today, increased holding pressure does not necessarily result in increased pedal pressure and the problems that accompany it. By re-engineering the leverage on the pressure plate through the HI-Leverage technique, we have increased clamping power, often without changing the pedal pressure. Through moving the pressure ring, Clutch Masters Hi-Leverage Pressure Plates take mechanical advantage of the leverage principal. Combining this technique with special re-arched, heat-treated, diaphragms we develop significantly more clamping force without unnecessarily increasing pedal pressure. This Hi-Leverage feature is unique to Clutch Masters.

Features of FX100-FX500

- Hi-Leverage Design
- Ductile Iron Casting*
- Heavy Duty Straps
- Precision Heat-Treated Diaphragm
- Re-Arched Diaphragm for Superior Disengagement
- Improved Clamping Force
- Minimal Increase in Pedal Pressure

*When Applicable

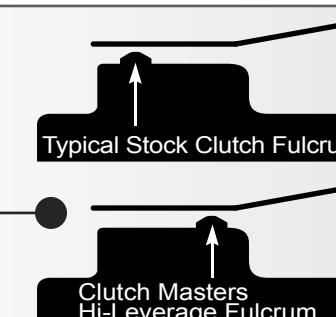

SFI APPROVED ON MOST RACE APPLICATIONS.

Re-Arched, Heat-Treated Diaphragm

Billet Aluminum Flywheel

Clutch Masters 2-Piece billet aluminum flywheels are made from the highest quality 6061-T6 or better grade aluminum. This material is chosen for its properties that are much more suitable for the environment than the one-piece chromoly units, with regards to heat dissipation and serviceability. The replaceable friction surface we use is incredibly tough high carbon steel. This allows mating with any type of clutch friction material without worry. The starter ring gears are made of high carbon heat-treated steel for long lasting durability. We button the unit together with military grade fasteners for what we feel is the premier piece in the industry today.

Replaceable High Carbon Inserts allow Clutch Masters to offer a Limited Lifetime Warranty

SFI APPROVED ON MOST RACE APPLICATIONS.

TYPICAL BENEFITS OF A LIGHTWEIGHT FLYWHEEL FOR VARIOUS ENGINE TYPES

- Reduced mass equals increased acceleration.
A lightweight flywheel works particularly well with turbocharged engines because it reduces typical turbo "lag".
- Increased supercharger efficiency due to less parasitic drag on the crank.
- Improved mid-range torque in a normally aspirated engine due to not having to overcome the heavy weight of a stock flywheel.
- Clutch Masters aluminum flywheels meet SFI spec 1.1 or 1.2

*The installation of a Clutch Masters aluminum flywheel should be strongly considered when changing to a performance clutch system.

FX700

Ultra High Performance Twin Disc Street or Race Systems

300-600% increase in holding capacity

Clutch Masters is proud to offer the finest and most economical multi-plate clutch systems, the FX600 and FX700 Series. Clutch Masters' Twin Disc systems are pure racing technology that also works well in high performance street applications. They are designed to hold tremendous torque ratings, while retaining a very smooth operation. By using a smaller diameter clutch assembly,

Clutch Masters Twin Disc systems have a reduced rotational mass, meaning quicker and smoother shifting and much better throttle response. By slightly increasing the clamping force of the pressure plate and adding to the square inches of usable disc area, CM Twin Discs significantly increase clamping values. The cover assembly is machined from billet aluminum with 25% more tensile strength than the competition's cast unit. They are available in three specific pressure ratings as well as several types of friction surfaces. The flywheel is machined from billet 6061-T6 aluminum to meet SFI spec 1.2 for competition in NHRA, NDRA, IDRC, IHRA, SCCA and NASA.

Clutch Masters Twin Disc features:

- Components can be purchased separately for economical repair
- Positive release for ease of High RPM Staging and Shifting
- Most have experienced better 4/10's times and averaged hundreds of passes without complications or repair

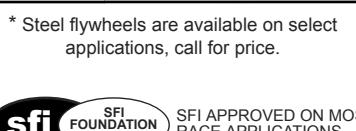

Choose from:

FX600 >Bonded Organic Kevlar mix for the street

FX700 >Compressed Ceramic Bronze for the strip

- All systems include:
- Cover Assembly with attached Diaphragm
 - Pressure Plate Ring
 - Two Discs
 - One Mid Plate
 - Billet Aluminum Flywheel*
 - Release Bearing
 - Pilot Bearing (when applicable)
 - Pressure Plate Bolts.

Average weight of the entire assembly is over 50% lighter than OEM.
SFI Approved.

* Steel flywheels are available on select applications, call for price.

LEGEND

A - Best Road Race (High Power)
B - Best Street/Strip
C - Drag Only
D - Harsh Engagement

E - Heavy Pedal
F - Long Life (No Road Race or Autocross)
G - Moderate Abuse, Moderate Power
H - Quick Engagement, Moderate Power
Best Road Race / Autocross (Moderate Power)

I - Significant Break-In Required
J - Smooth Engagement
K - Extreme, No Street
X - Available in extreme 2500lb plate load. (call for price)

We are CLUTCH MASTERS!

The premier manufacturer of quality clutches celebrating our 30 year anniversary. With this experience we have designed a superior line of custom clutch systems for the serious enthusiast.

We build Custom Clutches!

From street to racing applications, Clutch Masters will build a custom clutch for you. Clutch Masters has developed a complete line of proven high performance clutch systems that are able to achieve an unmatched level of smoothness and drivability. Our unique ability to customize our clutches to your specific application is what separates Clutch Masters from the rest.

We Deliver!

High Performance race proven, road ready applications that ensure proper energy transfer. Our many years of extensive R&D, technical support, and hands on approach have placed us at the pinnacle of our industry for both quality and customer service.

Test Instead of Guess is What We Do!

Clutch Masters is proud to say that all of its custom clutch systems are carefully matched and tested using precise digital equipment to ensure proper release and engagement. Every pressure plate is tested for balance and vibration free operation. The clutch is then checked for even engagement and pressure at three critical points. Accuracy is what it is all about.

Clutch Masters...

Where the competition slips, WE GRIP!

Clutch Masters works diligently to ensure that its performance products meet or exceed NHRA, IDRC, IHRA, NDRA, NASA, SCCA and SEMA requirements.
