

EncryptR
technology

**World's 1st
steel,
self locking
universal
transponder
box**

SECURE YOUR CAR. ENCRYPT YOUR REMOTE STARTER.

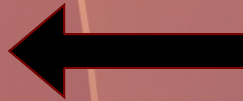

Only EncryptR™ technology lets you enjoy the benefits of remote starting knowing your vehicle is fully protected.

THE TECHNOLOGY

- * EncryptR™ employs proprietary encryption software that sends unique codes from the remote starter to the bypass module, that cannot be replicated or reversed with hi-tech equipment.
- * Since the command/communication is never exchanged in the same way twice, it's impossible for even expert thieves to duplicate; that ensures the best security possible for the remote starter system.

The EncryptR™ communication exchanged between the remote starter and the bypass module is best described as a "secret handshake" that is never the same and changes every time it's used.

The EncryptR™ shielded and sealed steel box is designed to be nearly impenetrable and requires far too much time and effort for any criminal.

ENCRYPTR™ TECHNOLOGY USES THREE EXCLUSIVE COMPONENTS

1. POLARSTART™ REMOTE STARTERS

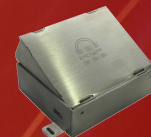

**PS3175E,
PS4461TWE
PS4661TWE**

2. IDATALINK MULTI SERIES

**ADS-AL-CA
ADS-TB**

3. STEEL SELF-LOCKING UNIVERSAL
TRANSPONDER BOX

ENCR-1

ADDED VALUE:

*ENCRYPTR™ offers a Limited Anti-Theft Warranty covering up to
\$2000 in the even of theft.
NO CONTRACT OR MONTHLY FEES.*

**DON'T EVEN THINK
OF USING A REMOTE
STARTER THAT'S
UNPROTECTED.**
