

NEW! HARNESS TRANSFORMERS FOR PARROT PRODUCTS

Produced by:
Hands Free Vehicle Technology

These Transformers offer:

❑ More Versatile – A single harness transforms to multiple applications.

❑ More Applications – A single harness transforms into:

- Non Amplified CK 3000 – CK 3100
- Non Amplified LS 3200 – MK & MKI

With HF-AMP- Interface:

- Amplified CK 3000 – CK 3100
- Amplified LS 3200 – MK & MKI

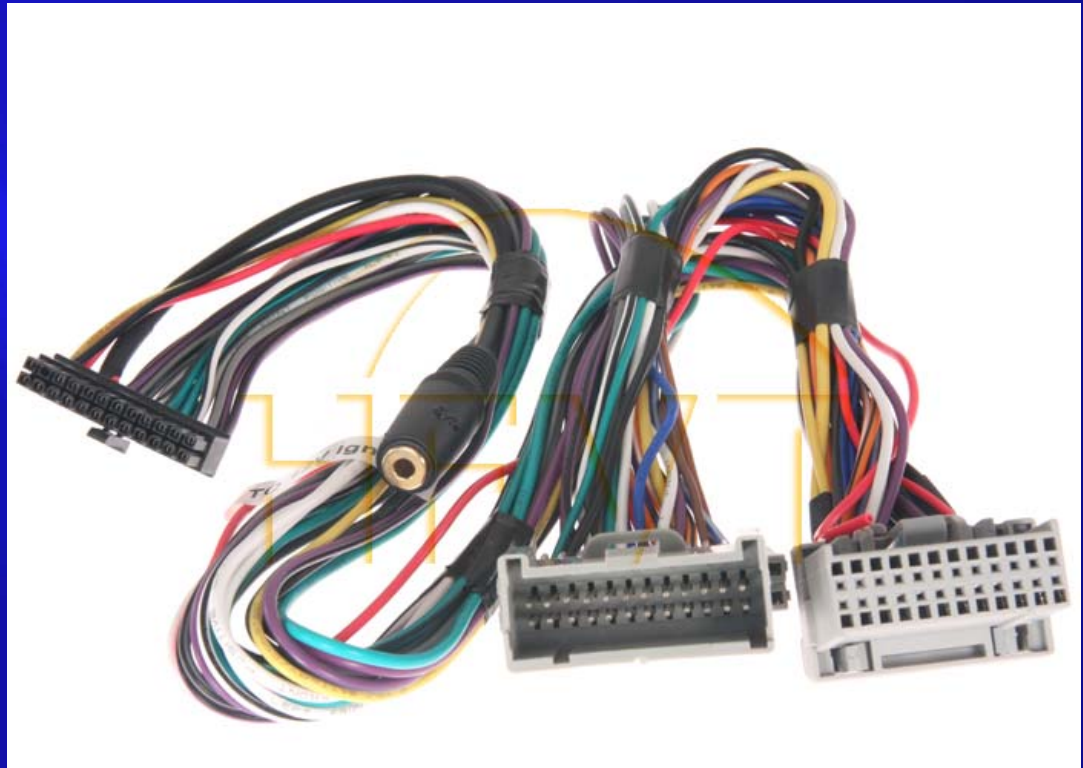

❑ More Uses – A 3.5mm AMK harness is equipped with a 3.5mm stereo connector. This transforms it to an AUX Out. This allows a connection to radios with AUX Inputs to play music.

Note: For amplified systems you will need to stock the amp boxes and accessories that go along with it.

**For example: The next 2 slides
are the package contents for an
unamplified GM setup**

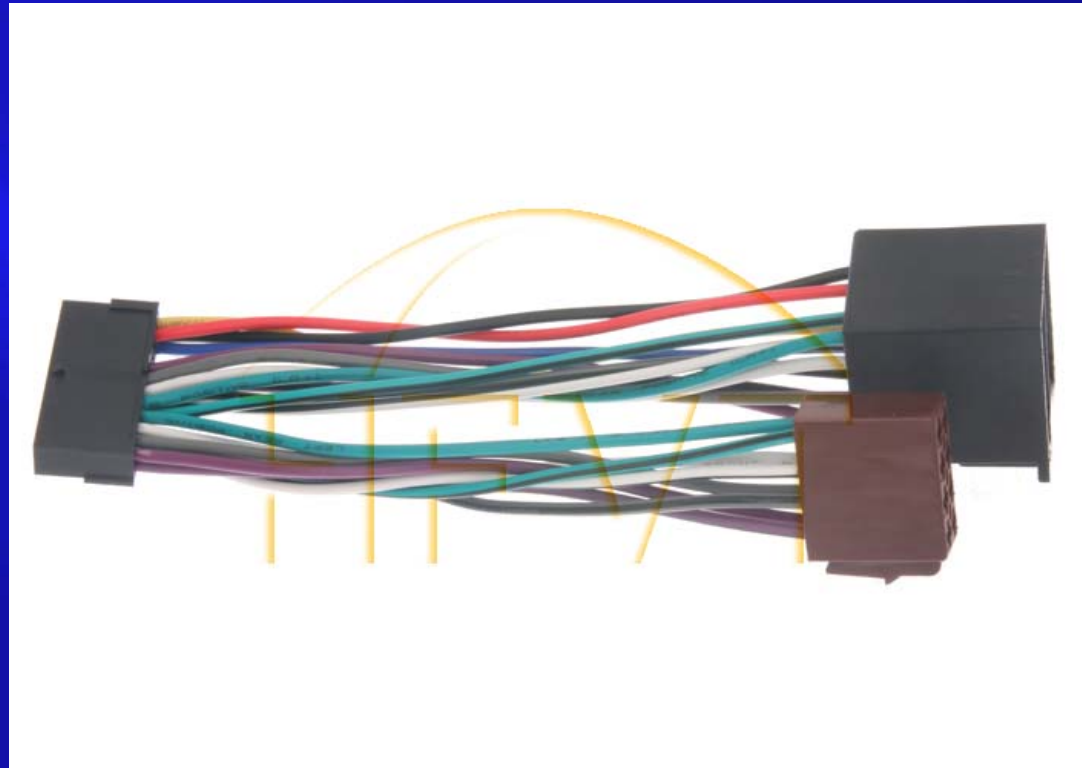

The Harness

- This harness is called HF-GM-TH2-AMK. It fits multiple GM products.
- This will plug directly into a LS 3200, MK, or MKI product eliminating the need for the ISO harness provided in the Parrot Kit for a simple and easy installation

The ISO Adapter

- This adapter is called HF-AMK-ISO
- This adapter plugs into the harness and allows it to be plugged into the CK 3000 and CK 3100
- This adapter which comes with the transformer harness will replace the need to stock a separate harness
- This package will eliminate the need to ask if it is being installed in a CK or MKI product

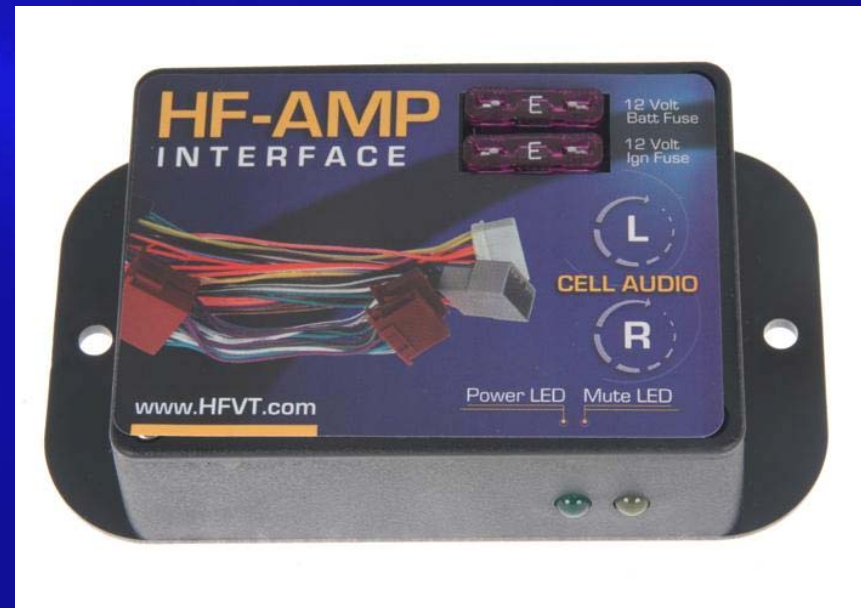

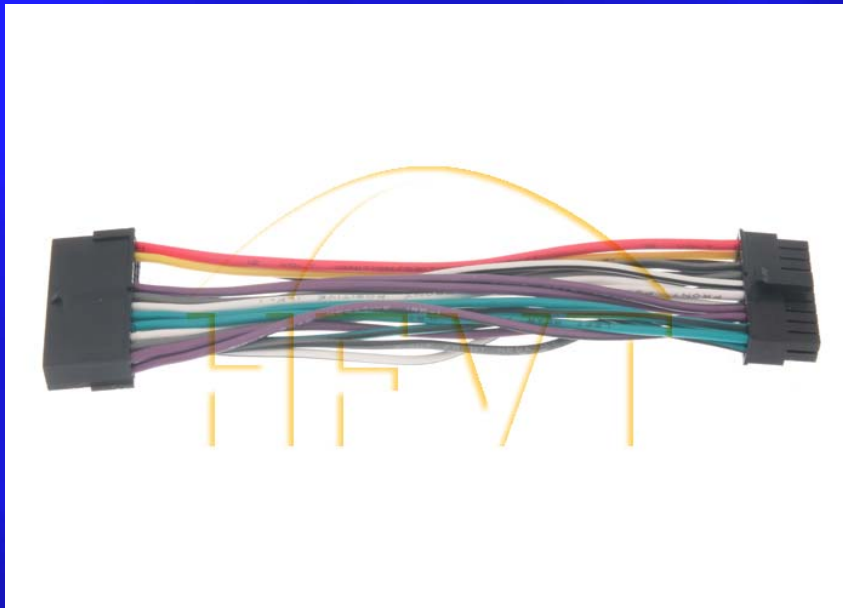

**The next 2 slides show the
contents of an amplified
package and an assembled
amplified setup**

Amplified Package

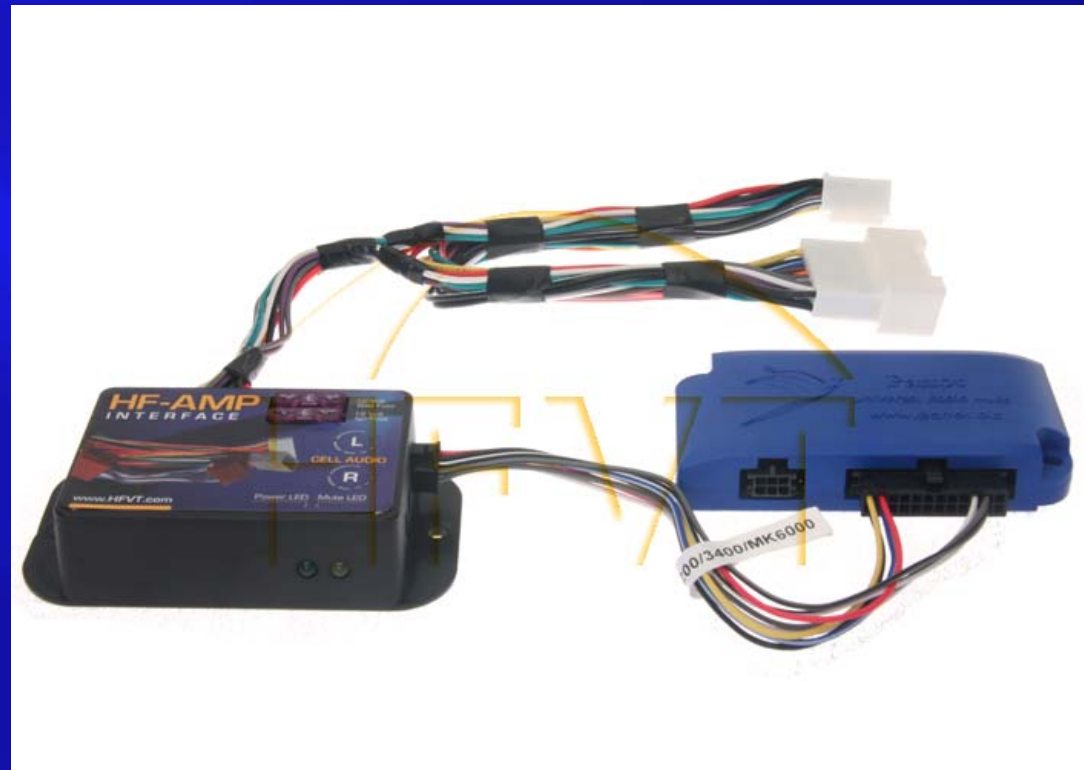

BY CONNECTING THE HF-GM-TH2-AMK HARNESS WITH THE HF-AMK-AMP ADAPTER (SHOWN BELOW) YOU GET THE HF-GM-TH2-AMK-AMP HARNESS.

WITH THE HF-GM-TH2-AMK-AMP HARNESS CONNECTED TO THE HF-AMP BOX (SHOWN BELOW) IT WILL NOW WORK WITH AN AMPLIFIED VEHICLE WITH ALL PARROT CAR KITS

Assembled Amplified Harness

- This is a picture to show how neat and simple the installation is with the new transformer harness
- This picture is of a JBL/Fossgate Application for a Toyota

Benefits

- ▣ **Less Inventory:**
 - Less SKU's
 - Less Qualifying Questions
 - Less Mistakes
 - Less returns
 - Less start up expense

Benefits

- ❑ Not having to stock multiple specialty harnesses. Simply stock the transformer harnesses and the amp boxes and you are good to go.
- ❑ Save money that would be spent on inventory of specialty harnesses
- ❑ More vehicles are covered by the same transformer harness package than the old harnesses

Benefits

- ▣ These products will be available in the old style for those who are use to them.
- ▣ But from a stocking stand point the new harnesses will require less inventory, less challenges with customers not knowing they have the wrong part until they are installing them which can add additional inconvenience to the customer as well as cost to you by having to send out a replacement harness.
