Footnotes & Troubleshooting Guide

FOOTNOTES

1. *An "altitude" version of this carburetor is also available. To order, add the suffix "A". Example 64-1591A*

2. *A Holley carburetor or TBI may be used to service a non-Holley original equipment application, such as this one. In such instances be assured that the Holley service carburetor or TBI that's used has been engineered as a direct "bolt-on" replacement. It is, in effect, the functional equivalent of the original equipment carburetor or TBI.*

3. *Due to limited core availability, this part can be remanufactured by Holley and returned (R&R). However, first check inventory for availability.*

4. *This part number may be available either as a Motorcraft model 1100 or a Holley model 1940. If there is a preference, please specify the one that is preferred.*

5. *For altitude use 64-6910*

TROUBLESHOOTING GUIDE

BEFORE PROCEEDING WITH CARBURETOR, CHECK THE BELOW ITEMS FIRST.

PROPER CARBURETOR OPERATION REQUIRES THE FOLLOWING.

1. Fuel Supply
2. Linkage and emission control systems.
3. Engine compression
4. Ignition system firing voltage
5. Ignition spark timing
6. Secure intake manifold
7. Engine temperature
8. Carburetor adjustments

ANY PROBLEMS IN THESE AREAS CAN CAUSE THE FOLLOWING

1. No start or hard starting - (hot or cold)
2. Rough engine idle and stalling
3. Hesitation on acceleration
4. Loss of power on acceleration and top speed
5. Engine to run uneven or surge
6. Poor fuel economy
7. Excessive emissions

NOTE - Make sure all emission control units are installed and operating properly. This includes all emission system solenoids and connecting hoses. Carburetor problems cannot be isolated effectively unless all other engine systems are operating correctly and the engine is properly tuned.

TROUBLESHOOTING GUIDE- (CONT'D)

PROBLEM: ENGINE CRANKS (TURNS OVER) BUT WILL NOT START OR STARTS HARD WHEN COLD

Note: When an engine fails to start, 90% of the time the fault will lie in the ignition system.

POSSIBLE CAUSE	CORRECTIVE ACTION
Improper starting procedure used.	Check to determine if proper starting procedure is used, AS OUTLINED in the owner's manual.
No fuel in gas tank	Add fuel. Check fuel gauge for proper operation.
Choke valve not closing sufficiently when cold	Adjust the choke thermostatic (Bi-metal) coil. Setting too lean. Improper voltage connection.
No fuel in carburetor	1. Remove fuel line at carburetor. Connect hose to fuel line and run into clean metal container. Remover the high tension coil wire from center tower on distributor cap and ground. Crank over engine - if there is no fuel discharge from the fuel line, check for kinked or bent lines. Check for a clogged or restricted fuel tank filler cap vent. Disconnect fuel line at tank and blow out with air hose, reconnect line and check again for fuel discharge. If none, replace fuel pump. Check pump for adequate flow, as outlined in service manual. 2. If fuel supply is o.k., check the following: a. Inspect fuel filter(s). If plugged replace.
Engine Flooded. NOTE: To check for flooding remove the air cleaner. With the engine off look into the carburetor bores. Fuel will be dripping off nozzles and/or the carburetor will be very wet.	Check to determine if customer is using proper carburetor unloading procedure. Depress the accelerator to the floor and check the carburetor to determine if the choke valve is opening. If not, adjust the throttle linkage and unloader, as specified.
Carburetor flooding.	Note: Before removing the carburetor air horn, use the following procedure which may eliminate the flooding. 1. Remove the fuel line at the carburetor and plug. Crank and run the engine until the fuel bowl runs dry. Turn off the engine and connect fuel line. Then restart and run engine. This will often flush dirt past the carburetor float needle and seat.

PROBLEM: ENGINE STARTS HARD WHEN HOT

POSSIBLE CAUSE	CORRECTIVE ACTION
Choke valve not opening completely	1. Check for binding choke valve and/or linkage. Clean and free-up or replace parts as necessary. DO NOT OIL CHOKE LINKAGE. 2. Check and adjust choke thermostatic coil. Setting maybe too rich, or insufficient voltage to choke thermostat. 3. Check for choke thermostatic coil binding in well or housing.

TROUBLESHOOTING GUIDE- (CONT'D)

Engine flooded-Carburetor flooding.	See procedure under "Engine cranks, will not start".
No fuel in carburetor.	1. Check fuel pump. Run pressure and volume test. 2. Check float needle for sticking in seat, or binding float.
Fuel Percolation.	Open throttle wide and operate starter to relieve over rich condition. Use an insulator flange gasket.
Vapor lock	Check pump pressure and volume. Improve under hood air circulation. Use an insulator flange gasket.

PROBLEM: ENGINE STARTS AND STALLS

POSSIBLE CAUSE	CORRECTIVE ACTION
Engine does not have enough fast idle speed when cold.	Check and reset the fast idle setting and fast idle cam.
Vacuum leak	Check hoses and gaskets for source with a leak detection fluid.
Contaminated fuel	Check for partially plugged or restricted fuel filter and needle, seat assembly. Replace if dirty.
Choke valve and/or linkage sticking or binding.	Clean and align choke valve and linkage.
Idle speed setting too low.	Adjust idle speed to specifications on decal in engine compartment.
Not enough fuel in carburetor.	1. Check fuel pump pressure and volume. 2. Check for partially plugged fuel inlet filter. Replace if dirty.
Incorrect idle mixture setting.	Reset to proper specifications or to highest, steady manifold vacuum reading (pre-emission engines)

PROBLEM: ENGINE IDLES ROUGH AND STALLS

POSSIBLE CAUSE	CORRECTIVE ACTION
Idle mixture adjustment.	Adjust idle mixture screws to lean best idle. Repeat the operation on 2 and 4V carburetor's. Now, turn mixture screws in until idle speed drops 25 R.P.M. on tachometer.
Idle speed setting.	Re-set idle speed per instructions on decal in engine compartment. Check solenoid operation.
Manifold vacuum hoses disconnected or improperly installed.	Check all vacuum hoses leading to the manifold or carburetor base for leaks, being disconnected or connected improperly. Install or replace as necessary.
Carburetor loose on intake manifold.	Torque carburetor to manifold bolts (100 in. lbs.) in a crisscross pattern at 20 in. lbs. increments.
Intake manifold is loose or gaskets are defective.	Using a pressure oil can, spray light oil or kerosene around manifold legs and carburetor base. If engine R.P.M. changes, tighten or replace the manifold gaskets or carburetor base gaskets as necessary.
Hot idle compensator not operating (where used).	Normally the hot idle compensator should be closed when engine is running cold and open when engine is hot (approx. 140° F at comp.) replace if defective.

TROUBLESHOOTING GUIDE- (CONT'D)

E.G.R. valve open or leaking.	Check for proper vacuum source connection and operation as specified in the vehicle's service manual.
Clogged or dirty air cleaner element.	Replace if necessary.
Clogged or restricted air bleeds.	Spray bleeds with carburetor cleaner, lacquer thinner or varnish remover then blow out with compressed air.
Improper fuel pump pressure.	Check fuel pump volume and pressure.
Plugged P.C.V. valve or crankcase breather.	Replace as necessary.

PROBLEM: ENGINE RUNS UNEVEN OR SURGES

POSSIBLE CAUSE	CORRECTIVE ACTION
Fuel Restriction.	Check all hoses and fuel lines for bends, kinks or leaks. Straighten and secure in position. Check all fuel filters. If plugged or dirty - replace.
Dirt or water in fuel system.	Clean fuel tank and lines. Remove and clean carburetor.
Fuel level	Adjust float. Check for free float and float needle valve operation.
Main metering jet loose or incorrect part.	Replace as necessary. See parts and specifications manual 36-51
Vacuum leaks.	It is absolutely necessary that all vacuum hoses and gaskets are properly installed, with no air leaks. The carburetor and manifold should be evenly tightened to specified torque.
E.G.R. valve open or leaking.	Check for proper vacuum source connection and operation as specified in the vehicle's service manual.
Clogged or dirty air cleaner element.	Replace if necessary.
Clogged or restricted air bleeds.	Spray bleeds with carburetor cleaner, lacquer thinner or varnish remover then blow out with compressed air.
Improper fuel pump pressure.	Check fuel pump volume and pressure.
Plugged P.C.V. valve or crankcase breather.	Replace as necessary.
Air leak into intake manifold.	Replace manifold gaskets and end seals with original equipment type or equivalent.

TROUBLESHOOTING GUIDE- (CONT'D)

PROBLEM: ENGINE HESITATES ON ACCELERATION

POSSIBLE CAUSE	CORRECTIVE ACTION
Dirt in pump passages or pump nozzle.	Clean and Blow out with compressed air.
Leaking air horn to float bowl gasket.	Torque air horn to float bowl using proper tightening procedure.
Carburetor loose on manifold.	Torque carburetor to manifold bolts. (60 in. lbs.)
Air leak into intake manifold.	Replace manifold gaskets and end seals with original equipment type or equivalent.
Primary throttle plates closed too far in throttle bore.	Check for vacuum leaks or carburetor too big for application.
Contaminated fuel or poor quality.	Clean fuel tank and lines. Remove and clean carburetor.

PROBLEM: NO POWER ON HEAVY ACCELERATION OR AT HIGH SPEED

POSSIBLE CAUSE	CORRECTIVE ACTION
Carburetor throttle valve(s) not going wide open. (Check by pushing accelerator pedal to floor).	Adjust throttle linkage to obtain wide open throttle in carburetor.
Dirty or plugged air cleaner or fuel filter(s).	Replace with new filter element.
Low fuel pressure or volume.	Check fuel pump against specifications for pressure and volume
Poor fuel quality.	Use a higher grade of gasoline or temporarily use a fuel additive.
Plugged P.C.V. valve or breather.	Clean or replace as necessary.

PROBLEM: POOR FUEL ECONOMY

POSSIBLE CAUSE	CORRECTIVE ACTION
Engine needs complete tune-up.	Check engine compression. Examine spark plugs, (if dirty or improperly gapped clean and re-gap or replace). Check ignition point condition and dwell setting. Readjust ignition points if necessary and check and reset ignition timing. Clean or replace air cleaner element if dirty. Check for restricted exhaust system and intake manifold for leakage. Make sure all vacuum hoses are connected correctly. Make sure emission systems are operating properly.
Fuel leaks.	Check fuel tank, fuel lines and fuel pump for any fuel leakage.
Air bleeds or fuel passages in carburetor dirty or plugged.	1. Clean carburetor 2. If gum or varnish is present in idle or high speed air bleeds they can be cleaned with lacquer thinner or choke solvent in a spray can.

TROUBLESHOOTING GUIDE- (CONT'D)

PROBLEM: ENGINE BACKFIRES

POSSIBLE CAUSE	CORRECTIVE ACTION
Binding or sticking choke valve.	Free up with choke solvent.
Accelerator pump not operating properly.	1. Remove air cleaner and observe pump discharge. 2. Readjust pump to specifications.
Old or dirty (fouled) spark plugs.	Clean or replace spark plugs.
Old or cracked spark plug wires.	Test with a scope if possible or observe wires on dark night with engine running. Replace wires.
Partially clogged air cleaner or fuel filter.	Replace with new filter element.
Backfire on deceleration. Defective air pump diverter valve.	Check hoses and fittings for tightness and leakage. Disconnect valve signal line. With engine running a vacuum must be felt. With engine idling, hold hand at exhaust port. No air should be felt. If valve or hoses defective then must be replaced.
Restricted bowl vents.	Remove air horn or fuel bowl and check for cleared passage with compressed air.
Plugged P.C.V. valve or breather.	Clean or replace as necessary.
Idle mixture screws improperly adjusted.	Reset to proper specifications or to highest, steady manifold vacuum reading (pre-emission engines).
Vacuum leaks.	Check hoses and gaskets for source with a leak detection fluid.

TORQUE RANGE - SPECIFIC APPLICATIONS

12 - 24	Bowl Screws	25 - 30 inch lbs.	7/16 - 24	Fuel Inlet Valve Seats	70-90 inch lbs.
1/4 - 32	Main Jet	30 - 40 inch lbs.	1/2 - 28	Power Valves, Spark Valves and Plugs	40 - 50 inch lbs.
1/4 - 32	Adjustable needle and Seat lock Screw	50 - 60 inch lbs.	9/16 - 24	Fuel Inlet Fitting	175 - 200 inch lbs.
5/16 - 24	Manifold / Carburetor Flange Nut	60 - 80 inch lbs.	7/8 - 20	Fuel Inlet Fitting	200 - 250 inch lbs.
5/16 - 24	Fuel Inlet Valve Seats	60- 80 inch lbs.

NEW

Holley REMAN

Holley is THE premiere remanufacturer of replacement carburetors and fuel injection throttle bodies. There is, however, more to Holley remanufacturing than just this. Holley also remanufactures a selection of its own performance carburetors, in addition to Rochester Quadra-Jets and AFBs.

A little bit more unconventional are the Ford tractor carburetors that are now offered, together with an extensive offering of governed carburetors that were used on medium- and heavy-duty domestic trucks. Rochester marine carburetors are also listed in an O.E. number to Holley cross reference. A very complete list ing of remanufactured original equipment fuel injec tors is included along with remanufactured turbochargers and superchargers.

The Holley remanufacturing business is extensive and multi-faceted to simultaneously address a number of markets and to accommodate different customers and end-users. As such, Holley wants to be your single source for quality remanufactured automotive fuel system products. Your serious consideration is invited.

Performance Carbs

2-Bbl - street performance - 350 & 500 CFM

350 CFM P/N **65-7448** (B) ◈3 - std. finish
500 CFM P/N **65-4412** (B) ◈3 - std. finish
500 CFM P/N **65-4412S** (B) ◈3 - silver finish

Features:
- Manual choke
- Center hung float bowl
- Universal throttle lever
- Ford A/T kickdown
- 30cc accelerator pump (350 CFM)
  50cc accelerator pump (500 CFM)
- Does not work with AOD transmissions
- Power valve blow-out protection may be included

65-4412

65-4412S

2-Bbl - circle track - 350 & 500 CFM

350 CFM P/N **65-7448CT** (B) ◈3 - std. finish
500 CFM P/N **65-4412CT** (B) ◈3 - std. finish

Features:
- No choke
- Center hung float bowl w/ vent baffle
- "Wedge-style" circle-track-design float
- 30cc / .028" accelerator pump (350 CFM)
  50cc / .031" accelerator pump (500 CFM)
- #66 main jet (350 CFM)
  #73 main jet (500 CFM)
- High flow 4.5" power valve
- Power valve blow-out protection may be included

65-4412CT

4-Bbl - street performance - 600 CFM

600 CFM P/N **65-1850** (B) ◈3 - std. finish (1964 & earlier)
600 CFM P/N **65-1850S** (B) ◈3 - silver finish (1964 & earlier)
600 CFM P/N **65-80457** (A) ◈1 - std. finish (1965-69)
600 CFM P/N **65-80457S** (A) ◈1 - silver finish (1965-69)

Features:
- Square bore
- Manual choke (65-1850, 65-1850S)
- Electric choke (65-80457, 65-80457S)
- Ford A/T kickdown (65-80457, 65-80457S)
- Side hung float bowls
- Non-stick gaskets
- Vacuum Secondary
- Power valve blow-out protection may be included

65-80457S

65-1850

(A) Not legal for street use in California on vehicles originally equipped with 2-barrel carburetors for which there was no 4-barrel option.

◈1 The product accompanying this document has been granted a California Air Resources Board (CARB) exemption, an "EO", or is a direct or consolidated replacement part. It is 50-state legal, per the manufacturer's application guide.

(B) Not legal for sale or use in California on any pollution controlled motor vehicles.

◈3 The product accompanying this document is legal only for off-highway use (except California or states that have adopted California emission standards), racing use or for use on pre-emission controlled motor vehicles/motor vehicle engines.

4-Bbl - street performance - 650 CFM

650 CFM P/N **65-80555** (B) ◈3 - std. finish
650 CFM P/N **65-80555S** (B) ◈3 - silver finish

65-80555

Features:
- Spread bore
- Q-Jet or Thermo-Quad replacement
- Electric choke
- Non-stick gaskets
- Vacuum secondary
- Power valve blow-out protection may be included

4-Bbl - street performance - 750 CFM

750 CFM P/N **65-3310** (B) ◈3 - std. finish
750 CFM P/N **65-3310S** (B) ◈3 - silver finish
750 CFM P/N **65-80508** (B) ◈3 - std. finish
750 CFM P/N **65-80508S** (B) ◈3 - silver finish

65-80508S

65-3310

Features:
- Square bore
- Manual choke (65-331-, 65-3310S)
- Electric choke (65-80508, 65-80508S)
- Ford A/T kickdown
- Center hung float bowls
- Non-stick gaskets
- Vacuum secondary
- Power valve blow-out protection may be included

4-Bbl - street performance - 600 thru 750 CFM

600 CFM P/N **65-4776** (B) ◈3 - std. finish
600 CFM P/N **65-4776S** (B) ◈3 - silver finish
650 CFM P/N **65-4777** (B) ◈3 - std. finish
650 CFM P/N **65-4777S** (B) ◈3 - silver finish
700 CFM P/N **65-4778** (B) ◈3 - std. finish
700 CFM P/N **65-4778S** (B) ◈3 - silver finish
750 CFM P/N **65-4779** (B) ◈3 - std. finish
750 CFM P/N **65-4779S** (B) ◈3 - silver finish

65-4779

Features:
- Square bore
- Manual choke
- Double accelerator pumps
- Center hung float bowls
- Non-stick gaskets
- Vacuum secondary
- Power valve blow-out protection may be included

ROCHESTER QUADRA-JET CARBURETOR

Is trying to find that elusive Rochester Quadra-Jet performance carburetor a task akin to finding the Holy Grail?

Your quest is over! Holley has introduced a new line of its own quality remanufactured Quadra-Jet performance carburetors. The product line consists of four (4) highly consolidated part numbers that are intended to restore that "like new" performance, economy and reliability. All this at a fraction of the cost when compared to the competition.

Professionally rebuilt at the Holley remanufacturing plant in Springfield, TN, each carburetor is completely disassembled, inspected and thoroughly cleaned prior to being resurrected. Replaced with brand new components are items such as the needle and seat (.144" seat) assembly, primary throttle plates, primary throttle shaft bushings, gaskets, vacuum diaphragms, rubber hoses, O-rings, electric choke cap (where used) and a new viton accelerator pump cup.

Components that may be re-used are all thoroughly cleaned, inspected, tested and compared against stringent O.E.M. quality specifications for that part's design and performance functions. Any part that cannot pass quality tests is automatically replaced with a new one. All brass pieces are cleaned in a special chemical process that is designed to remove any varnish or gum build-up. All zinc castings, likewise, are thoroughly inspected and treated to a premium dichromate finish to bring the finish back to its original equipment luster

All carburetors are 100% wet flow tested and each is specifically calibrated for improved performance in the off-idle and mid-range. A new flange gasket is also included.

Part #	CFM	Application
65-1901(A)◆1	750 CFM	1966-73 Chevrolet/GMC cars/trucks w/ 327-427 CID V8
Features: *Divorced choke, EGR compatible, .072 main jets, 42B primary metering rods, DR secondary metering rods*		
65-1902(A)◆1	750 CFM	1974-78 Chevrolet/GMC cars/trucks w/ 350-454 CID V8
Features: *Divorced choke, EGR compatible, .072 main jets, 42B Primary metering rods, DR secondary metering rods*		
65-1903(A)◆1	750 CFM	1975-85 Chevrolet/GMC cars/trucks w/ 305-454 CID V8
Features: *Hot air choke, EGR compatible, .073 main jets, 50M primary metering rods, DR secondary metering rods*		
65-1904(A)◆1	750 CFM	1980-89 Chevrolet/GMC cars/trucks w/ 305-454 CID V8
Features: *Electric choke, EGR compatible, .073 main jets, 41K primary metering rods, DR secondary metering rods*		

(A) Not legal for street use in California on vehicles originally equipped with 2-barrel carburetors for which there was no 4-barrel option.

◆1 The product accompanying this document has been granted a California Air Resources Board (CARB) exemption, an "EO", or is a direct or consolidated replacement part. It is 50-state legal, per the manufacturer's application guide.

UNIVERSAL AFB CARBURETOR

If your old Chrysler or GM car seems like it's needing a new shot of adrenalin, it might be time to replace that old worn out factory AFB carburetor with one rebuilt by Holley. Likewise, if your old Edelbrock or Federal-Mogul AFB doesn't seem as sharp as it once was, it may be time to switch to a "new" AFB, quality-rebuilt by Holley

Let's face it nothing lasts for ever and that as every carburetor deteriorates over time, its performance is marginalized. You can really appreciate the loss of performance in an engine trying hard to work through a carburetor that has seen its better days. Fortunately Holley has a solution to this problem in the way of a new line of like-new quality remanufactured AFB universal performance carburetors. Going this route, you can bring back that old sizzle at a fraction of the cost of a new carburetor

Professionally rebuilt at the Holley remanufacturing plant in Springfield, TN, each carburetor is completely disassembled, inspected and thoroughly cleaned prior to being reassembled. Replaced with brand new parts are items such as the needle and seat (.110" seat) assembly, gaskets, vacuum diaphragms, rubber hoses, O-rings and a new viton accelerator pump cup.

Components that may be re-used are all thoroughly cleaned, inspected, tested and compared against stringent O.E.M. quality specifications for that part's design and performance functions. Any part that cannot pass quality tests is automatically replaced with a new one. All brass pieces are cleaned in a special chemical process that is designed to remove any varnish or gum build-up. The aluminum castings are treated to a vibratory process to bring back the factory finish.

All carburetors are 100% flow tested and each is specifically calibrated for improved performance in the off-idle and mid-range. A new flange gasket is included.

Part #	CFM	Application
65-1405(B) ◆3	600 CFM	Universal performance (1964 & earlier)with manual choke.

Features: *Includes vacuum ports for "timed" spark and full vacuum. Threaded hole provided for power brake or PCV. Main metering jets are .100 primary and .095 secondary. Metering rods used are .070 x .047. Power system spring set for 5" Hg*

65-1406(A) ◆1	600 CFM	Universal performance (1965-69) with electric choke.

Features: *Includes vacuum ports for "timed" spark and full vacuum. Threaded hole provided for power brake or PCV. Main metering jets are .098 primary and .095 secondary. Metering rods used are .075 x .047. Power system spring set for 4" Hg*

(A) Not legal for street use in California on vehicles originally equipped with 2-barrel carburetors for which there was no 4-barrel option.

(B) Not legal for sale or use in California on any pollution controlled motor vehicles.

◆1 The product accompanying this document has been granted a California Air Resources Board (CARB) exemption, an "EO", or is a direct or consolidated replacement part. It is 50-state legal, per the manufacturer's application guide.

◆3 The product accompanying this document is legal only for off-highway use (except California or states that have adopted California emission standards), racing use or for use on pre-emission controlled motor vehicles/motor vehicle engines.

NOTE: check for availability before ordering

FORD TRACTOR CARBURETORS*

You know the old saying that "You make hay while the sun shines". Well, these Marvel-Schebler carburetors for the old Ford tractor, rebuilt-by-Holley, will help you to plow those furrows like nobody's business!

Holley completely disassembles each carburetor and every part is inspected and thoroughly cleaned. Replaced with brand new components are items such as the needle and seat assembly, throttle shaft bushings, gaskets, diaphragms, rubber hoses, O-rings, choke cap and accelerator pump.

Some components may be re-used and these are compared against stringent O.E.M. quality specifications to assure that part's design and performance functions. Any part that cannot pass these quality tests is automatically replaced with another. All brass pieces are cleaned in a special chemical process that is designed to remove any varnish or gum build-up. All zinc castings, likewise, are thoroughly inspected and treated to a premium dichromate finish to bring the finish back to its original equipment luster

These carburetors are 100% wet flow tested to bring your tractor's performance back to like the good ol' days.

GOVERNED TRUCK CARBURETOR APPLICATIONS

Time is money, especially when you must rely on your truck to make a living. Many of the older gasoline-powered medium and heavy duty trucks had governed carburetors. What do you do when THAT carburetor needs replacement? Turn to Holley

Holley is the hands-down expert on fuel systems. Over the years Holley has developed and built many original equipment governed carburetors for Chevrolet, Ford, Dodge and International Harvestor trucks. It makes sense, therefore, that Holley should be your first choice when changing over carburetors.

The Holley carburetor remanufacturing process provides for a complete and thorough recon ditioning of these carburetors. Many items are replaced with new such as the needle and seat assembly, throttle shaft bushings, gaskets, diaphragms, rubbers hoses, O-rings, choke cap and accelerator pump components. Other parts that may be re-used are inspected, cleaned and, if required they are replated to assure continued O.E. function and reliability. These carburetors are 100% wet flow tested to bring performance back to "work-duty".

REMANUFACTURED MARINE CARBURETOR CROSS REFERENCE

Waiting for a tow on the open water is no fun, especially on a nice weekend. Just as bad is a motor that won't start at the beginning of what you thought would be a nice day on the lake. The problem is most boats are not used on a daily basis during Summer months and then they're stored away for up to six months during the Winter. This can cause all sorts of problems with the fuel stored in the boat tanks and that which remains in the carburetor. More often than not, the average marine carburetor lies in dire need of some required attention. Fortunately, Holley has available a line of remanufactured Rochester marine carburetors that are quality rebuilt by the Holley remanufacturing plant in Springfield, TN.

The Holley rebuilding process assures that each carburetor is completely disassembled and every part inspected and cleaned. Replaced with brand new are components such as the needle and seat assembly, throttle plates, throttle shaft bushings, gaskets, diaphragms, rubber hoses, O-rings, choke cap and accelerator pump. Other components may be re-used and these are completely inspected against stringest O.E.M. quality specifications to assure complete function and dependability. If a part does not meet these Holley standards, it is replaced with another. Zinc castings are thoroughly inspected and treated to a new dichromate finish for corrosion protection.

As a final step, all carburetors are wet-flow tested to ensure complete reliability and functional performance.

Holley remanufactured fuel injectors are built to meet strict OEM specifications.

The Holley remanufacturing process consists of quality inspections that:

- Tests coil resistance to ensure it matches OEM specifications
- Conduct leak tests to pressure twice the normal operating conditions
- Perform flow tests to ensure proper spray pattern and fuel delivery at multiple pulse widths
- All injectors are assembled with 100% new O-rings and filter baskets.

Remanufactured Fuel Injector Removal and Installation Guide

The removal and reinstallation of fuel injectors can be accomplished with the help of a service manual, specific to your vehicle. This manual will take the guess work out of this job and can be used in the future for other vehicle maintenance tasks. If you do not have one, they can be purchased at your local parts store. Expect this job to take the better part of a morning or afternoon to complete, depending on your vehicle.

Basic Tools Required

- *A service manual specific to the vehicle*
- *Standard and/or metric socket and ratchet set with extensions*
- *Standard and Phillips screw drivers*
- *Needle nose pliers*
- *Torx head drivers or socket bits*
- *C-clip removal/installation pliers*

Removal Highlights

- *Fuel injection systems are pressurized. Before removing injectors, bleed off the fuel pressure by starting the vehicle and pulling the fuel pump fuse. This will allow the engine to use all of the fuel that is in the line, and stall. When this occurs remember to turn the key to its OFF position.*

- *Remove the negative (N) ground cable from the battery. Wrap the connector with a rag and lay it aside.*

- *Remove the air cleaner or air delivery system. Clean and vacuum the area around the injectors prior to removal. CAUTION - Do not allow any dirt, debris or small parts to enter the intake system. Serious engine damage can occur!*

- *Follow the service manual instructions for the remainder of the removal process.*

NOTE: *Be careful not to bend or distort any of the terminals or injector retainers during disassembly! You will need them during reinstallation. If damaged they will need to be replaced. Retainers are available through your local automotive parts store.*

Installation Highlights

- *Holley remanufactured fuel injectors come complete with new O-ring seals. Remove the protective cap(s) and lightly lubricate each seal with either transmission fluid or 30W, non-detergent motor oil prior to installation. This lubrication will protect the new seals from damage that can occur during installation. It will also reduce the pressure necessary to seat the injectors into the TBI or port injection system.*

NOTE: *In some cases the O-ring seal may come off with the protective cap, when removed. Simply install the O-ring back into position, if this occurs.*

INJECTOR INSTALLATION

- *Complete all reinstallation steps according to the service manual.*
- *Check all other vacuum lines for signs of cracking or wear. Replace as necessary. A vacuum leak will seriously reduce the performance of the vehicle.*
- *Recheck all connections to ensure they are secure.*
- *Clean up any spilled fuel that may have drained from the fuel rail or TBI.*
- *Reconnect the ground lead to the battery.*
- *Reinstall the fuel pump circuit fuse into the fuse panel.*
- *Remove all tools, rags, etc. from the engine compartment.*

NOTE: *At this point you are ready to start the engine. It's a good idea to have a fire extinguisher (all-purpose, full charged) on hand and ready to use in the unlikely event of fuel leakage problem. Have a second person restart the engine. This will allow you to look for any fuel leaks that may occur.*

- *Turn the ignition key to its mid-starting position and allow the fuel pump to fill the system for five (5) seconds. Return the key to its OFF position. NOTE: The dashboard should light up and you should hear humming sound from the fuel pump. This is normal.*
- *Repeat the above step.*
- *Start the vehicle.*

NOTE: *The fuel system may not be entirely filled at this point. It may take two or three initial attempts to start the engine. CAUTION: Do not allow the starter to run for periods longer than fifteen (15) seconds at a time.*

- *After starting depress the accelerator to rev the engine and return to idle. CAUTION: Do not over rev the engine. Repeat the above step several times while checking for fuel leakage and to ensure that there is no throttle linkage binding or sticking that could cause the throttle to stick in an open position. Correct any fuel leaks or binding conditions that occur.*

HAPPY MOTORING!

Thank you for selecting Holley. If you have any questions, concerns or comments about Holley remanufactured products or this installation procedure, you can contact Holley toll free at 1-888-HOLLEY5 (1-888-465-5395).

SUPERCHARGERS

Features:

- *Completely disassembled and ultrasonically cleaned for complete restoration to like-new condition*
- *New high performance bearings and seals*
- *Hand assembled by trained technicians*
- *Individually serialized and cataloged with performance data recorded*
- *Pressure leak tested*
- *Synthetic gear oil used for long life*
- *Dyno-tested to ensure maximum performance*
- *One year warranty against manufacturing defects*

TURBOCHARGERS

Features:

- *Completely disassembled and cleaned to ASNEW condition*
- *New O-rings, bearings, seals and gaskets*
- *Computer precision balanced CHRA (center housing rotating assembly) cartridge*
- *Hand rebuilt to factory O.E. specifications*
- *One year warranty against manufacturing defects*

Product Warranty

Holley Performance Products warrants its remanufactured products to be free from defects in material or workmanship. The following warranty periods apply:

Replacement carburetors and TBIs	***90 days***
Holley performance carburetors	***90 days***
Rochester Quadra-Jet carburetors	***90 days***
Carter AFB carburetors	***90 days***
Ford tractor carburetors	***90 days***
Truck governed carburetors	***90 days***
Marine carburetors	***90 days***
Replacement fuel injectors	***1 year***
Replacement turbochargers	***1 year***
Replacement superchargers	***1 year***

This warranty is extended to the original consumer, only. There are no warranties which extend beyond those stated here. Any implied warranty determined to be applicable is limited to the dura - tion of this warranty.

This warranty does not cover products that have been:
(a) *modified or altered outside factory specifications*
(b) *subjected to conditions such as misuse, neglect, accident, improper installation or adjustment, dirt or other contaminants, water or corrosion, gum or varnish, use of improper or poor quality fuel additives, improper fuel pressure and faulty repair*
(c) *used in other than those automotive applications recommended in the manufacturer's catalog*

In the event of a defect in material or workmanship, the manufacturer's sole responsibility is to repair or replace the defective product. Final warranty determination will be the decision of the manufactur - er. Responsibility shall not include actual or alleged labor, transportation or other incidental charges, or actual or alleged consequential or other damages incurred by use of this product.

Warranty performance will be initiated by first contacting the Holley Remanufacturing Technical Services Hot Line, toll free, at ***1-888-HOLLEY5 (1-888-465-5395)****. At this time a Holley technical representative will analyze your problem and may offer to repair or replace the defective product.*

NOTE: *You must offer to provide Holley with your proof of purchase in the form of the original dated sales receipt, in order to initiate the warranty process.*

This warranty gives you specific legal rights, and you may also have other rights that vary from State to State, or Province to Province. Some states or provinces may or may not allow limitations on how long an implied warranty lasts, or may not allow the exclusion or limitation of incidental or conse - quential damages. So, the above limitations or exclusions may not apply to you. This Limited Warranty supersedes all prior warranty statements. Inquiries concerning this warranty should be directed to Holley Performance Products at ***1-888-HOLLEY5 (1-888-465-5395)****.*
